

ITEM 619.52----25 – NEW TEMPORARY CONCRETE BARRIER PLACED FOR TRAFFIC CONTROL

1. DESCRIPTION:

- 1.01 All the provision of Section 619 pertaining to Temporary Concrete Barrier shall remain in effect except as modified below:
- 1.02 Under this item the Contractor shall supply new (unused) Temporary Concrete Barrier. It shall be installed for traffic control during construction.

2. MATERIALS:

- 2.01 The new barrier shall meet the requirement of Section 700 material details. These materials shall be sampled and tested in accordance with the Authority's written instructions.

The barrier shall be fabricated in accordance with Section 704-05, precast concrete barrier and all details shown on the appropriate standard sheet. The connection keys and hardware shall be galvanized.

Any modification requested in the proportioning, air content, slump and curing shall be submitted to the Engineer for approval.

3. CONSTRUCTION DETAILS:

- 3.01 The Contractor shall furnish new barrier, deliver and set the barrier at locations shown in the plans. The barrier shall be maintained by the Contractor.

4. METHOD OF MEASUREMENT

- 4.01 The barrier shall be measured by the linear foot installed.

5. BASIS OF PAYMENT

- 5.01 The price bid per linear foot shall include the cost of all labor, equipment, connection keys, delineators and material necessary to furnish, install and maintain the barrier to project completion.
