A	B

STRUCTURAL STEEL NOTES:

- 1). [REDACTED]
- 2). BOLT HOLES: [REDACTED]
- 3). COATINGS: [REDACTED]

BOLT, NUT, AND WASHER NOTES:

[REDACTED]

INSTALLATION PROCEDURE:

- REVIEW THIS RECOMMENDED PROCEDURE BEFORE INSTALLATION. VARIATIONS TO THIS PROCEDURE CAN BE CARRIED OUT. REGARDLESS, THE STABILIZING COMPONENTS MUST BE FULLY INSTALLED BEFORE THE WEIGHT OF THE HORIZONTAL SIGN SUPPORT OR VERTICAL SIGN SUPPORT IS APPLIED TO THE FASCIA BEAM OR GIRDER. ALL DAMAGED GALVANIZED COATINGS SHALL BE REPAIRED WITH ZINC MATERIAL. TACK WELDING OF ANY KIND IS NOT ALLOWED.
- 1). VERIFY INSTALLATION LOCATION SHOWN IN GENERAL PLAN. ADJUST ENTIRE SIGN STRUCTURE POSITION TO AVOID INDIVIDUAL SIGN SUPPORTS INTERFERING WITH EXISTING DIAPHRAGMS OR OTHER OBSTRUCTIONS.
  - 2). FIELD DRILL AND TEMPORARILY INSTALL FASCIA STABILIZING TEE.
  - 3). VERIFY REQUIRED SIGN CLEARANCE OVER ROADWAY, OR OTHER VERTICAL CONTROL POINT, AND FIELD DRILL VERTICAL SIGN SUPPORT.
  - 4). FIELD DRILL AND INSTALL INTERIOR STABILIZING TEE.
  - 5). FIELD DRILL AND INSTALL UPPER & LOWER STABILIZING ANGLES.
  - 6). SUPPORT FASCIA STABILIZING TEE (USING DRIFT PINS, ETC) AND REMOVE FASTENERS USED FOR TEMPORARY INSTALLATION IN STEP 2.
  - 7). INSTALL HORIZONTAL SIGN SUPPORT AND CROSS-BRACING (IF SPECIFIED) ALL FASTENERS SHALL BE FULLY TIGHTENED BEFORE THE WEIGHT OF THE SUPPORT IS APPLIED TO THE BRIDGE.
  - 8). INSTALL VERTICAL SIGN SUPPORT IF NOT ALREADY INSTALLED TO HORIZONTAL SIGN SUPPORT.
  - 9). REPEAT STEPS 2 THROUGH 8 FOR EACH SIGN SUPPORT.
