

Tappan Zee Bridge / I-287 Corridor Study

Project Status Update Stakeholder Committee Meeting

Agenda

- Process SAFETEA-LU / NEPA
- Evaluation Criteria
- Alternatives
- Project Schedule
- Path Forward

Project Goals

- Improve mobility and accessibility
- Meet travel demand (include transit)
- Maintain infrastructure
- Improve safety and security
- Avoid/minimize/mitigate adverse impacts
- Provide cost-effective solutions

Project History

- Notice of Intent published in Dec. 2002
- Considerable work done to date
- August 10, 2005 SAFETEA-LU enacted (Reauthorization Federal Transportation Bill)

SAFETEA-LU

- Major modification of federal law governing the planning and implementation of surface transportation projects
- Section 6002 features a revised environmental review process

SAFETEA-LU Section 6002

Purpose:

- Streamlines the environmental review process and expedites project delivery
- Focuses on early and frequent public involvement
- Limits the potential for project delays

SAFETEA - LU Section 6002

Streamlining Features:

- Formal Process of Identification and engagement of Participating and Cooperating Agencies
 - Agencies must formally commit to the project
 - Coordination Plan Identifies roles and responsibilities of the involved agencies and public
 - Agencies and public comments need to be addressed and resolved

SAFETEA - LU Section 6002

Public Involvement Features:

- Public Involvement and Agency review
 - Coordination Plan, Purpose and Need Statement, Range of Alternatives, and methodologies for evaluating alternatives
 - Agencies must adhere to rules and schedules of the NEPA review process

SAFETEA - LU Section 6002

Limits Potential Delay:

- Agencies must settle on critical criteria in timely manner
- Agencies must adhere to prescribed timelines for reviews and comment periods

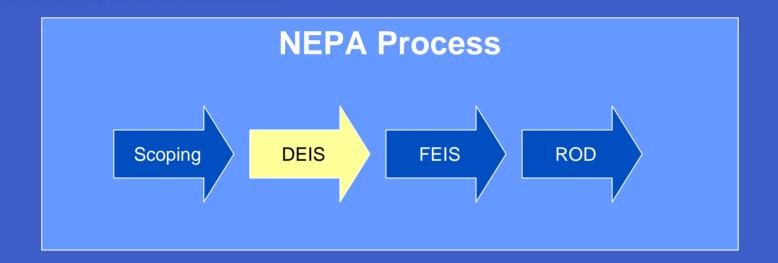

NEPA Process

Reasons for Change

- Lead Agencies determined that a new Notice of Intent is needed for the following reasons:
 - Desire to adopt Section 6002
 - Need to narrow the range of Alternatives
 - Addition of NYSDOT as a co-lead agency
 - Necessary phasing of bridge, highway, transit improvements

Specific Project Issues

- Operating characteristics, service plans, station types/locations, etc. requires extensive additional detailed design effort
- Advancing transit designs and impact analyses requires extensive community input; must also meet community planning objectives

Specific Project Issues

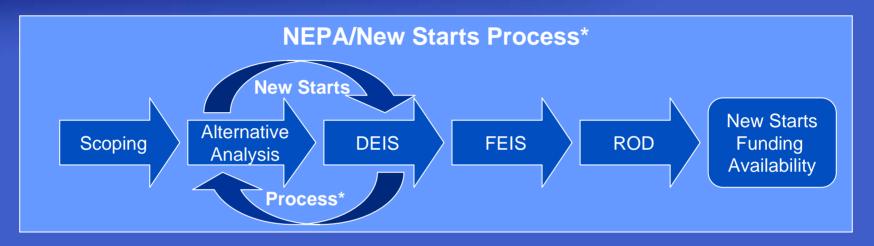

- Affiliating the transit planning process with highway and bridge design negatively impacts the overall schedule
- Every year of additional effort costs \$ 100s Millions in escalation through inflation
- Scope, complexity and cost <u>all</u> alternatives require a phased implementation
- Federal transit funding applications require an iterative review process that negatively impacts the overall project schedule

NEPA Strategy

- Requires an innovative approach addressing:
 - Project's complex issues (coordination with local planning entities, funding and timing)
 - National average for New Starts Projects is approximately 8 years

Tiering Transit & Highway/Bridge elements accomplishes this strategy

Revised NEPA Approach

DEIS document and FEIS document resulting in:

- Transit Tier I ROD
 - ROD (Tier 1) identifying the preferred transit mode, termini and alignment
 - Planning level scenario
 - Sets groundwork for future
 Tier 2 ROD for Transit

- Highway/Bridge Tier 2 ROD
 - ROD (Tier 2) will advance
 Bridge and Highway work
 - Accommodate reasonable improvements identified within the Tier 1 Transit Analysis
 - Address detailed transit needs and impacts in the Highway/Bridge Corridor

Assured Advancement of Comprehensive Multi-Modal Project Preserves potential New Starts funding opportunity

NEPA Tiered Approach

Transit Mode Selection

Preferred Alternative Selection

DEIS Publication

Public Hearing

FEIS Publication

Anticipated NEPA Results

Transit ROD (Tier 1 ROD)

Planning level decision to select a transit mode in the Corridor; defining an Alignment and identifying impacts to the bridge design and construction. Based on a planning level study. Future Tier 2 ROD anticipated.

Highway/Bridge **ROD (Tier 2 ROD)**

Traditional NEPA decision disclosing impacts and mitigation for the Highway and Bridge improvements. It will include impacts and mitigation from the Transit **ROD** that impact Bridge design and construction. Based on more detailed analysis than Tier 1.

Subsequent **Activities**

Transit NFPA **Evaluation**

Transit **ROD** (Tier 2 ROD)

Transit Engineering Design and Construction

Highway/Bridge **Engineering Design and Construction**

Evaluation of Alternatives

- Transit Mode Selection
 Criteria
- Bridge Rehab / Replace
 Evaluation Criteria

Transit Mode Criteria Purpose

- Compilation of criteria to help select mode or modes
- Update analyses from Stage 1
 - -2035 vs 2025
 - Other projects like ARC
- Test some new options based on public comments

Level 3 Transit Mode Evaluation Criteria

- Transportation
 - Transit Ridership
 - Roadway Congestion
 - Capacity
 - Travel Time
- Environmental
 - Land Use, Transit Oriented Development
 - Wetlands, Parkland, Historic/Archaeological
- Cost
 - Capitol Costs
 - Operating Costs
 - Costs per passengers/passenger mile
 - Benefit savings

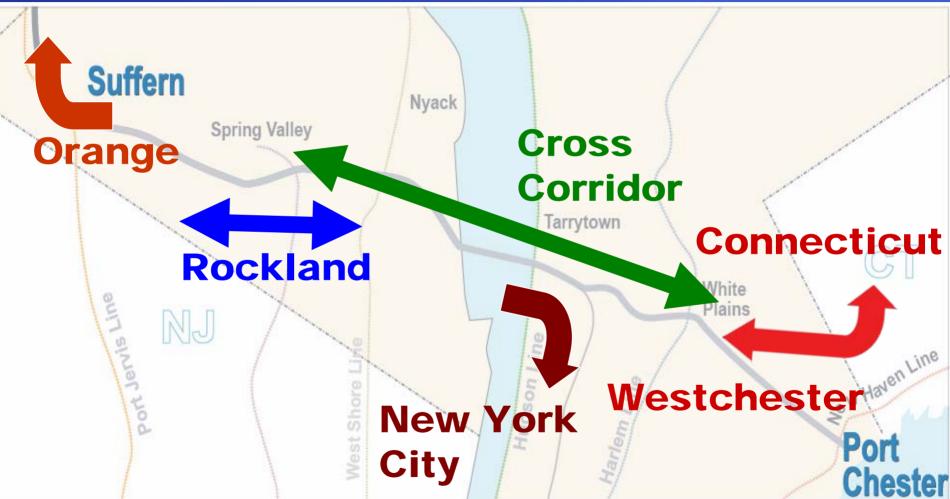

Major Markets

Bridge Rehab/Replacement Evaluation Criteria

- Environmental
- Transportation
- Cost Effectiveness
- Engineering
 - Structural Integrity
 - Vulnerability
 - Seismic
 - Redundancy
 - Emergency response
 - Navigation
 - Construction impacts
 - Life span

Existing Bridge

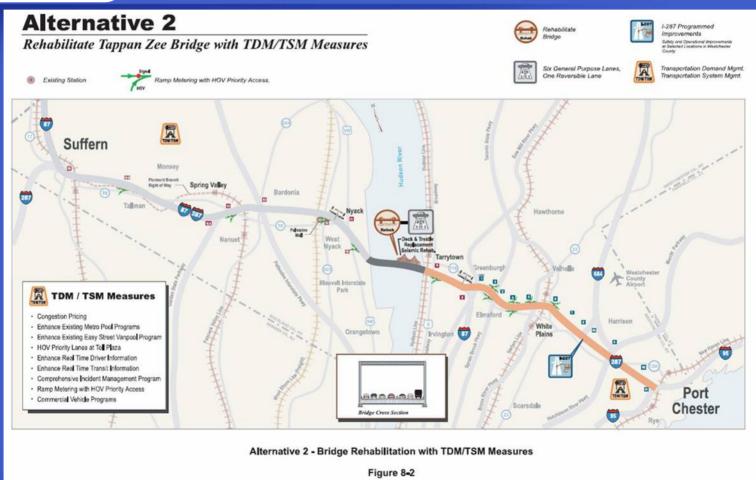

Rehabilitation

Rehabilitation Options

Replacement Options

Finalize Bridge Process

- Develop details of options
- Develop cost estimates
- Evaluate options against criteria
- Solicit input from various sources
- Report in DEIS

Alternatives/Options Under Consideration

BRT Alternative 3

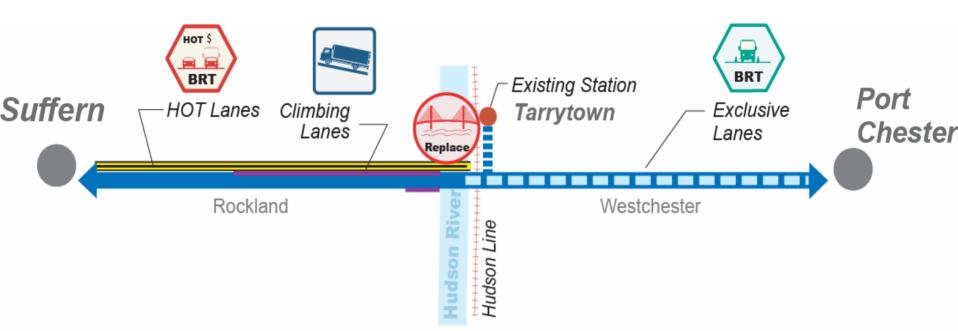

Option 3A Full Corridor BRT

With an enhanced service plan, additional stations, extended bus lanes on Westchester Ave., and busway connection to Port Chester Station

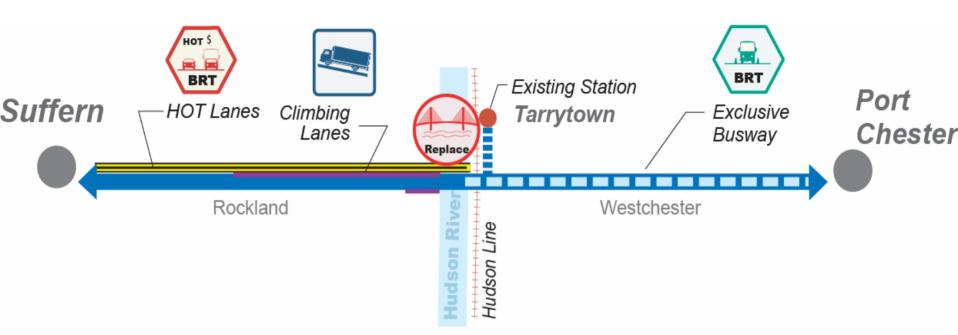

Option 3B Full Corridor BRT

Dedicated busway in Westchester

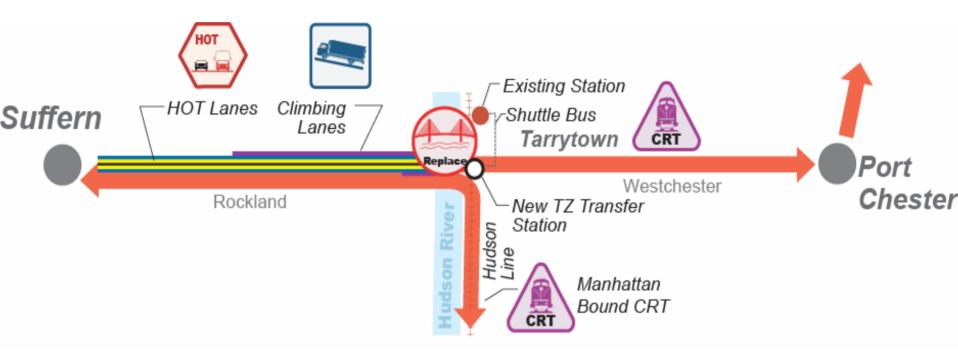

Alternative 4A Full Corridor CRT

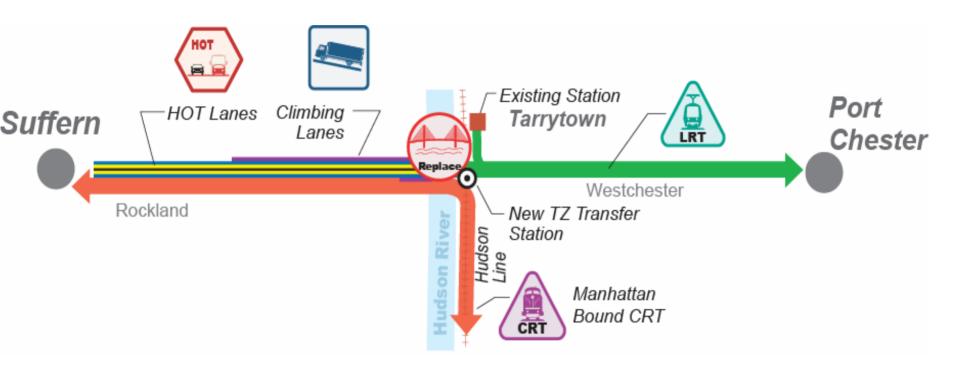

Alternative 4B Manhattan Bound CRT with LRT in Westchester

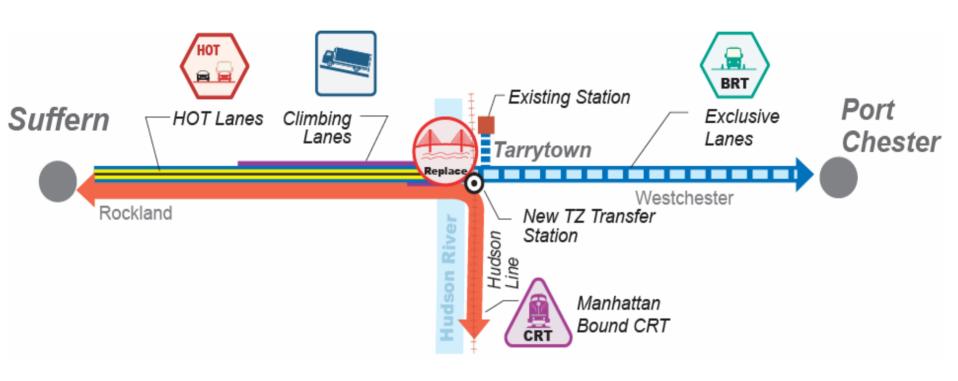

Alternative 4C Manhattan Bound CRT with BRT in Westchester

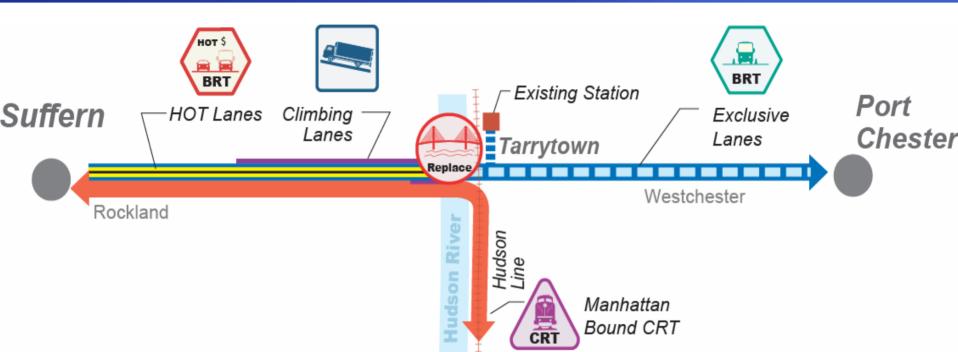

Option 4D Manhattan Bound CRT with full corridor BRT

Path Forward...

- Project Initiation letter to FHWA and FTA
- Reissue NOI to redefine agency roles and responsibilities, trigger Section 6002, and introduce Tiering
- Identify and invite Cooperating and Participating Agencies
- Update Project Coordination Plan to reflect SAFETEA-LU 6002

Path Forward Cont...

- Distribute Scoping Update Packet
- Address agency and public comments:
 - Scoping Update Summary Report
 - Level 3 Transit Mode Analysis
 - Bridge Rehab/Replacement Criteria
- Select transit mode(s) for evaluation in DEIS
- Complete DEIS per project schedule

Outcomes

- Guarantees a multimodal solution
- Ensures transit is developed properly with extensive community involvement
- Ensures critical work on bridge starts sooner, mitigating cost escalations
- Ensures earlier completion and implementation of the complete project
