LIMITED WARRANTY AND DISCLAIMER OF LIABILITY

Who is Covered
This limited warranty is extended by Toxics Targeting, Inc. only to the original purchaser of the accompanying Environmental Report ("Report"). It may not be assigned to any other person.

What is Warranted
Toxics Targeting, Inc. warrants that it uses reasonable care to accurately transcribe the information contained in this Report from the sources from which it is obtained. This limited warranty is in lieu of all other express warranties which might otherwise arise with respect to the Report. No one is authorized to change or add to this limited warranty.

What We Will Do
If during the warranty period there is shown to be a material error in the transcription of the information contained in this Report from the sources from which it was obtained, Toxics Targeting, Inc. shall refund to the original purchaser the full purchase price paid for the Report. The remedy stated above is the exclusive remedy extended to the Purchaser by Toxics Targeting, Inc. for any failure of the Report to conform with this Warranty, or otherwise for breach of this Warranty or any other warranty, whether expressed or implied.

What We Won’t Cover
Toxics Targeting, Inc. has not and can not verify the accuracy, correctness or completion of the information contained in this Report. Information is obtained from government agencies, site owners, and other sources, and errors are common in such information. Because Toxics Targeting, Inc. can not control the accuracy of the information contained in this Report, or the uses which may be made of the information, TOXICS TARGETING, INC. DISCLAIMS LIABILITY TO ANYONE FOR ANY EVENTS ARISING OUT OF THE USE OF THE INFORMATION. TOXICS TARGETING, INC. SHALL NOT BE LIABLE FOR ANY DAMAGE CAUSED BY THIS REPORT, WHETHER DIRECT OR INDIRECT, AND WHETHER OR NOT TOXICS TARGETING, INC. HAS BEEN ADVISED OF OR HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES. TOXICS TARGETING, INC. EXPRESSLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

Period of Warranty
The period of warranty coverage is ninety days from the date of purchase of this Report. There shall be no warranty after the period of coverage. ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR USE SHALL HAVE NO GREATER DURATION THAN THE PERIOD OF WARRANTY STATED HERE, AND SHALL TERMINATE AUTOMATICALLY UPON THE EXPIRATION OF SUCH PERIOD. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you.

PLEASE REFER TO PAGES ONE AND FIVE FOR A DESCRIPTION OF SOME OF THE LIMITATIONS OF THIS ENVIRONMENTAL REPORT.

© Toxics Targeting, Inc. 2011
Introduction

Toxics Targeting has combined environmental database searches, extensive regulatory analysis and sophisticated mapping techniques to produce your Environmental Report. It checks for the presence of 21 categories of government-reported toxic sites and provides detailed, up-to-date information on each identified site. The findings of your report are presented in an easy-to-understand format that:

1. **Maps** the approximate locations of selected government-reported toxic sites identified on or near a specified target address.

2. **Estimates** the distance and direction between the target address and each identified toxic site.

3. **Reports** air and water permit non-compliance and other regulatory violations.

4. **Profiles** some aspects of the usage, manufacture, storage, handling, transport or disposal of toxic chemicals at individual sites.

5. **Summarizes** some potential health effect information and drinking water standards for selected chemicals reported at individual sites.

The Three Sections Of Your Report

The first section highlights your report's findings by summarizing identified sites according to: a) distance intervals, b) direction, c) proximity to the target address and d) individual site categories. In addition, the locations of all identified toxic sites are illustrated on individual maps for each radius search distance used in your report. A close-up map illustrates the locations of all identified toxic sites, at the shortest radius search distance used in your report. Finally, a map of tax parcels and a table of selected information about those parcels are included.

The second section of your report contains Toxic Site Profiles that provide detailed information on each identified toxic site. The information in each Toxic Site Profile varies according to its source. Some toxic site categories have extensive information, some have limited information. All the information is updated on a regular basis.

The third section of the report contains appendices that identify: 1) on-site spills reported to the national Emergency Response Notification System (ERNS), 2) various toxic sites that cannot be mapped due to incomplete or erroneous addresses or other mapping problems, 3) codes that characterize hazardous wastes reported at various facilities, 4) methods used to map toxic sites identified in your report and 5) information sources used in your report.

How to Use Your Report

- Check Table One to see the number of identified sites by distance intervals.

- Check Table Two to see identified sites sorted by direction.

- Check Table Three to see identified sites sorted by site categories.

- Check Table Four to see identified sites ranked by proximity to the target address.

- Use Table Five to get info for the subject parcel and every parcel found on the Tax Parcel Map

- Refer to the various maps to see the locations of identified toxic sites. Refer to the Toxic Site Profile and Appendix sections for additional information.
Toxic Site Databases Analyzed In Your Report

Search Radius

One-Mile

1) National Priority List for Federal Superfund Cleanup: a listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program.

Half-Mile

2) Delisted National Priority List Sites: a listing of NPL sites that have been removed from the National Priority List.

One-Mile

3) New York Inactive Hazardous Waste Disposal Site Registry: a state listing of sites that can pose environmental or public health hazards requiring investigation or clean up.

One-Mile

One-Mile

5) RCRA Corrective Action Activity (CORRACTS): waste facilities with RCRA corrective action activity reported by the USEPA.

Half-Mile

6) CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System): a federal listing of Non-NFRAP sites that can pose environmental or public health hazards requiring investigation or clean up.

Half-Mile

7) CERCLIS NFRAP: a federal listing of CERCLIS sites that have no further remedial action planned.

Half-Mile

8) New York State Brownfield Cleanup Sites: a listing of sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Half-Mile

9) New York Solid Waste Facilities Registry: active and inactive landfills, incinerators, transfer stations or other solid waste management facilities.

Half-Mile

10) New York and Federal Hazardous Waste Treatment, Storage or Disposal Facilities: sites reported by the NYS manifest system and the USEPA’s Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following database:

- RCRA violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act..
11) **Toxic Spills: active and inactive or closed** spills reported to state environmental authorities, including remediated and unremediated leaking underground storage tanks. This database includes the following categories:

- Tank Failures
- Tank Test Failures
- Unknown Spill Cause or Other Spill Causes
- Miscellaneous Spill Causes

12) **New York State Major Oil Storage Facilities**: sites with more than a 400,000-gallon capacity for storing petroleum products.

13) **New York and Local Petroleum Bulk Storage Facilities**: sites with more than a 1,100-gallon capacity for storing petroleum products.

14) **New York and Federal Hazardous Waste Generators and Transporters**: sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRA). Also includes the following database:

- **RCRA violations**: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

15) **New York Chemical Bulk Storage Facilities**: sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size

16) **New York Hazardous Substance Disposal Site Draft Study**: a state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites are not eligible for state clean up funding programs.

17) **Federal Toxic Release Inventory Facilities**: discharges of selected toxic chemicals to air, land, water or treatment facilities.

18) **Federal Air Discharges**: Air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies.

19) **Federal Permit Compliance System Toxic Wastewater Discharges**: permitted toxic wastewater discharges.

20) **Federal Civil and Administrative Enforcement Docket**: judiciary cases filed on behalf of the U.S. Environmental Protection Agency by the Department of Justice.
21) **ERNS**: *Federal Emergency Response Notification System Spills*: a listing of federally reported spills.
Limitations Of The Information In Your Report

The information presented in your Environmental Report has been obtained from various local, state and federal government agencies. Please be aware that: 1) additional information on individual sites may be available, 2) newly discovered sites are continually reported and 3) all map locations are approximate. As a result, this report is intended to be the FIRST STEP in the process of identifying and evaluating possible environmental threats to specific properties and can only serve as a guide for conducting on-site visits or additional, more detailed toxic hazard research.

Toxics Targeting tries to ensure that the information in your report is presented accurately and with minimal alteration. The only systematic changes that are made correct obvious address errors in order to allow sites to be mapped. Any address changes that are made are noted in the map information section at the top of each corresponding Toxic Site Profile. Since the information presented in your report is not edited, please be aware that it can contain reporting errors or typographical mistakes made by the site owners/operators or government agencies that produced the information. Please be aware of some other limitations of the information in your report:

- The map used by Toxics Targeting is the same one used by the U. S. Census. While the map is generally accurate, no map is perfect. In addition, Toxics Targeting's mapping methods estimate where toxic site addresses are located if the address is not specifically designated on the Census map. FOR THESE REASONS, ALL MAP LOCATIONS OF ADDRESSES AND REPORTED TOXIC SITES SHOULD BE CONSIDERED APPROXIMATE AND SHOULD BE VERIFIED BY ON-SITE VISITS;

- UNDISCOVERED, UNEPRESSED OR UNMAPPABLE TOXIC SITES MIGHT NOT BE IDENTIFIED BY THIS REPORT'S CHECK OF 21 TOXIC SITE CATEGORIES. TOXIC SITES REPORTED IN OTHER GOVERNMENT DATABASES MIGHT ALSO EXIST. FOR THESE REASONS, YOUR REPORT MIGHT NOT IDENTIFY ALL THE TOXIC SITES THAT EXIST IN THE AREA IT SEARCHES;

- The appendix of your report contains a listing of sites that could not be mapped due to incomplete or erroneous address information or other mapping problems. This listing includes unmappable toxic sites in zip code areas within one mile of the target address as well as toxic sites without zip codes reported in the same county. IF YOU WOULD LIKE INFORMATION ON ANY OF THE LISTED SITES, PLEASE CONTACT TOXICS TARGETING AND REFER TO THE SITE ID NUMBER.

- Some toxic sites identified in your report may be classified as known hazards. Most of the toxic sites identified in your report involve potential hazards related to the on-site use, manufacture, handling, storage, transport or disposal of toxic chemicals. Some of the toxic sites identified in your report may be the addresses of parties responsible for toxic sites located elsewhere. YOU SHOULD ONLY CONCLUDE THAT TOXIC HAZARDS ACTUALLY EXIST AT A SPECIFIC SITE WHEN GOVERNMENT AUTHORITIES MAKE THAT DETERMINATION OR WHEN THAT CONCLUSION IS FULLY DOCUMENTED BY THE FINDINGS OF AN APPROPRIATE SITE INVESTIGATION UNDERTAKEN BY LICENSED PROFESSIONALS;

- Compass directions and distances are approximate. Compass directions are calculated from the subject property address to the mapped location of each identified toxic site. The compass direction does not necessarily refer to the closest property boundary of an identified toxic site. The compass direction also can vary substantially for toxic sites that are located very close to the subject property address.

- The information presented in your report is a summary of the information that Toxics Targeting obtains from government agencies on reported toxic sites. YOU MAY BE ABLE TO OBTAIN ADDITIONAL INFORMATION ABOUT REPORTED SITES WITH THE FREEDOM OF INFORMATION REQUEST FORM LETTERS THAT ARE PROVIDED ON THE INSIDE OF THE BACK COVER.
Section One:

Report Summary

• **Table One**: Number of Identified Toxic Sites By Distance Interval

Westchester County
Section Two: Toxic Site Profiles

The heading of each Toxic Site Profile refers to the site's map location and details:

- The facility name, address, city, state, and zip code.
- Any changes that were made to a site's address in order to map its location.
- The site mapping method that was used (see How Sites are Located, at the end of this section for more information).

Toxic Site Profiles summarize information provided by site owners or operators and government agencies regarding various toxic chemical activities reported at each site, such as:

- Whether chemicals were stored, produced, transported, discharged or disposed of.
- The name of chemicals and their Chemical Abstract Series (CAS) numbers.
- The amount of chemicals and the units (gallons/pounds) the chemical was measured in.
- Whether the site or storage tanks at the site are currently active or inactive.
- Special codes used by government agencies to regulate hazardous waste activities at some sites, or a complete description of the codes follows the profiles section.

For selected individual chemicals reported at various toxic sites, some potential health effect summary information appears below the site profile. Each potential health effect summary identifies chemicals by name and by Chemical Abstract Series (CAS) Number. An "x" under each potential health effect heading indicates positive toxicity testing results reported by the National Institute of Occupational Safety and Health's Registry of Toxic Effects of Chemical Substances (RTECS). Some chemicals (mostly appearing in profiles of Hazardous Waste facilities), are reported as mixtures, and RTECS health effect information is only available for individual chemicals. In addition, RTECS only provides information on approximately 100,000 common chemicals. Consequently, the absence of potential health effect summary information for a particular chemical identified in a Toxic Site Profile does not necessarily mean that the chemical does not pose potential health effects.

The Maximum Contaminant Level (MCL) in drinking water allowed for selected chemicals is also noted. In most cases, the only applicable MCL has been set by the New York State Department of Health (NYSDOH). Where NYSDOH has not set an MCL, the federal standard, if one exists, is listed and is marked by an asterisk.

Presented below are column headings that describe the health effect definitions used in RTECS and applicable New York State and federal drinking water standards. Reference sources for information presented in this section are also provided.

**ACUTE TOX:** Acute Toxicity: Short-term exposure to this chemical can cause lethal and non-lethal toxicity effects not included in the following four categories.

**TUMOR TOX:** Tumorigenic Toxicity: The chemical can cause an increase in the incidence of tumors.
MUTAG TOX: **Mutagenic Toxicity**: The chemical can cause genetic alterations that are passed from one generation to the next.

REPRO TOX: **Reproductive Toxicity**: May signify one of the following effects: maternal effects, paternal effects, effects on fertility, effects on the embryo or fetus, specific developmental abnormalities, tumorigenic effects, or effects on the newborn (only positive reproductive effects data for mammalian species are referenced).

IRRIT TOX: **Primary Irritant**: The chemical can cause eye or skin irritation.

MCL: **Drinking Water Standard - Maximum Contaminant Level** (MCL) listed under Drinking Water Supplies, 10 NYCRR Part 5, Subparts 1.51(f),(g), and (h) for NYDOH MCL's and under the Safe Drinking Water Act, 40 CFR 141, Subparts B and G, (* indicates value for total trihalomethanes) for federal MCL's.

Reference Source for Toxicity Information: Registry of Toxic Effects of Chemical Substances (RTECS), NIOSH (on-line database); For further information, contact: NIOSH, 4676 Columbia Parkway, Cincinnati, OH, 45226, 800/35-NIOSH.

Inactive Hazardous Waste Disposal Site Classifications: 1 -- Causing or presenting an imminent danger of causing irreversible or irreparable damage to the public health or the environment -- immediate action required; 2 -- Significant threat to the public health or environment -- action required; 3 -- Does not Present a significant threat to the environment or public health -- action may be deferred; 4 -- Site properly closed --requires continued management; 5 -- Site properly closed, no evidence of present or potential adverse impact -- no further action required; 2a -- This temporary classification has been assigned to sites where there is inadequate data to assign them to the five classifications specified by law; A -- Work underway and not yet complete; P -- Potential Site; D1, 2, 3 -- Delisted Site (1: hazardous waste not found; 2: remediated; 3: consolidated site or site incorrectly listed); C -- Remediation Complete (formerly D2).

ALBANY, NY 12201

NAME:    NYS Thruway Authority
ADDRESS: 200 Southern Boulevard, PO Box 189
Albany, NY 12201

SITE DESCRIPTION:
This unpermitted dump site, along the Hudson River adjacent to the Tappan Zee Bridge, accepted construction and demolition debris, and paints containing heavy metals and solvents. Most of the waste materials were in a ravine and along a steep bank. The wastes were removed and the ravine filled in 1987. A PRP Phase II Investigation was completed in 1993. A groundwater monitoring program was implemented at this site. Groundwater samples were collected from selected on-site monitoring wells from March 1994 through April 1995 and were analyzed for volatile organics and metals (chromium, lead and zinc). Based on the Phase II Investigation and follow-up monitoring, it was determined that the wastes disposed of at this site were successfully removed, and that any levels of contamination remaining in the groundwater do not pose a threat to public health or the environment.

CONFIRMED HAZARDOUS WASTE DISPOSED:

<table>

<tbody>
<tr>
<td>LEAD PAINTS (D008)</td>
<td>UNKNOWN</td>
</tr>
<tr>
<td>IGNITABLE WASTES (D001)</td>
<td>UNKNOWN</td>
</tr>
</tbody>
</table>

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Groundwater was found to be contaminated with metals and chlorinated solvents at levels exceeding Class GA Standards. It has been determined that the wastes disposed at this site were successfully removed and that no significant threat to the public health or environment remains.

ASSESSMENT OF HEALTH PROBLEMS:
Public access is restricted by fencing, the Hudson River is on the west, toll booths are on the east, and an extreme grade is on the north and south. The potential for exposure to paint residues has been eliminated since contaminated soils were removed from the site. Exposure to contaminants in groundwater is not expected since homes and businesses in the area are supplied with public water.

HAZARDOUS MATERIAL SPILLS INTRODUCTION

The Hazardous Material Spills in this section are divided into eight spill cause groupings. These include:

Active Spills Section: Spills with incomplete paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

1) Tank Failures
2) Tank Test Failures
3) Unknown Spill Cause or Other Spill Cause Hazardous Spills

Closed Status Spills Section: Spills with completed paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

5) Tank Failures
6) Tank Test Failures
7) Unknown Spill Cause or Other Spill Cause Hazardous Spills

All spills within each spill cause category are presented in order of proximity to the subject site address.

Please note that spills reported within 0.25 mile (or one-eighth mile in New York City) are mapped and profiled.

Between 0.25 mile (or one-eighth mile in New York City) and 0.5 mile, only the following spills are mapped and profiled:

* Tank Failures;
* Tank Test Failures;
* Unknown Spill Cause or Other Spill Cause;
* Spills greater than 100 units of quantity; and
* Spills reported in the NYSDEC Fall 1998 MTBE Survey.

A table at the end of each section presents a listing of reported Miscellaneous Spills with less than 100 units located between 0.25 mile (or one-eighth mile in Manhattan) and 0.5 mile. These spills are neither mapped nor profiled.

Caller Remarks:

SUNOCO--2 PUMP PNEUMATIC RECOVERY SYSTEM THROUGH CARBON. DISCHARGE TO SANITARY SEWER. DEC OWNED VES ALSO ON SITE.

DEC Investigator Remarks:

Prior to Sept. 2004 data translation this spill Lead_DEC Field was "HARDY"
11/19/86 DEC TO INVESTIGATE.

12/22/86 LINE BEING REPAIRED WILL BE RETESTED.

12/30/86 TES HIRED BY DEC TO CLEAN UP AND CONDUCT SUBSURFACE INVESTIGATION.

1/5/87 MONITORING WELLS TO BE INSTALLED SHELL TO TEST TANKS.

2/6/87 TES TO INSTALL TWO MORE MONITORING WELLS.

2/19/87 DEC INSTALLED EIGHT MONITORING WELLS.

4/1/87 TWO MONITORING WELLS AT REAR OF BANK CONTAIN FREE PRODUCT.

4/16/87 WELLS AT BANK HAD PRODUCT AND WERE BAILED OUT TWO WELLS AT SUNOCO CONTAINED PRODUCT.

10/1/87 RECOVERY SYSTEMS TO BE INSTALLED AT BOTH THE BANK AND SUNOCO.

09/30/88: WELL #1,2,3 HAD 1/2" FREE PRODUCT. WELL #4 HAD 1/4"
FREE PRODUCT. WELL #5 WAS CLEAN.

08/28/98: LETTER SENT TO LAND AIR WATER BY J. HARDY; PLEASE REVIEW MOST RECENT REPORT FROM SHELL

12/02/99 LETTER SENT TO LAND, AIR WATER; SUBMIT COMMENTS RELATED TO MALCOLM PIRNIE’S LETTER IN A LETTER REPORT
TO THIS DEPARTMENT

12/02/99 LETTER SENT TO MALCOLM PIRNIE; APPROVE REQUEST TO SHUT

DOWN REMEDIAL SYSTEMS TO GATHER DATA RELATED TO NATURAL

FLOW CONDITIONS AT THIS SITE

12/09/99 LETTERS SENT TO BARRIER OIL & LAND AIR WATER; MALCOLM

PIRNIE WANTS TO MONITOR WATER LEVELS WITH ALL SYSTEMS

OFF

04/19/01 LETTER SENT TO MALCOLM PIRNIE BY J. HARDY; DEC AGREES

THAT THE SUNOCO AND SHELL SITES CAN BE HANDLED SEPARATELY.

04/19/01 LETTER SENT TO R. BANNISTER AG'S OFFICE BY J. HARDY

07/05/01 LETTER SENT TO MALCOLM PIRNIE BY J. HARDY; VAPOR

EXTRACTION TEST IS NECESSARY TO DETERMINE EXTENT OF

CONTAMINATION REMAINING AT THIS SITE.

04/25/03: Letter to R.A. Hulihan, Miller Environment, from J. Hardy, Plan to continue sampling is approved.

10/15/2004 spill 12004 (chase bank) closed as it is handled as part of this spill.

June '08 Shell is to continue to sample GW for their portion of this site, including some DEC MWs, under spill # 9605663. PJD

6/29/09 hess submitted workplan 6/16 to install 4 borings/mw's between tankfeild and rt119; looking for additional info per my request but were given approval to preclear locations with air knife. JH

10/6/2009 -- Spoke with Don and EnviroTrac. Ed Russo says the report will be submitted within the next couple of weeks. ELM

4/22/10 assumptions for pin cost estimate as submitted to jom, pd, em:spill 8605287 Barrier/sunoco Product remains in the median between what is now hess and shell--it is unresolved who will address that product--it is possible this question will not be resolved this year in which case DEC expenditure would be 0. If DEC must take over we could probably say this is not an emergency and do nothing this year. If management wants to address the product cost would depend on how aggressively we want to
tackle it. For starters say the range for this site could be from 0 to 25,000.

6/15/10 hess requested closure of spill

7/15/10 after internal discussion it was decided that closure request should be denied until Hess resolves the contaminatin in the rt 119 divider. Email informing hess and consultant of this decision sent this date

7/21/10 EnviroTrac confirms mw numbers for 3 wells in the divider

Caller Remarks:
Caller states large fuel slick and strong smell of diesel in a creek that runs into the Hudson River by the Tappanzee Bridge. The caller lives at 20 Tappan Landing Rd.

DEC Investigator Remarks:

J. O'Dee, DEC, to respond. KAB

10/12/08: Found a small amount of free product in stream behind property at 20 North Tappan Landing Rd. Owner of that property does not have heating oil. Source cannot be determined at this time. Booms and pads put in place; will return in daylight. jod

10/11/08: Call from Mr Dunn. More free product is pooling up behind booms. jod

10/12/08: Hired Tri-State Environmental for boom and pad replacement and maintenance. Source identified as 550 gallon tank at 94 Church Street. Tank is above-ground under porch, bare steel set directly onto a rock surface. Property is a rental. Tenant states workers were on site yesterday doing yard work - covered part of tank with sand. Sand is now saturated with oil. Tank is approx two-thirds full; appears to be an on-going leak. Owner of property is absent. Property managed by:
Anthony Loddo Real Estate (and General Contractors)
21 Waldo Avenue
White Plains, NY 10606
914-948-5918
There is no answer at this number and the voice-mailbox is full. Left message with Tarrytown Bldg Dept, trying to obtain the name and contact number for the actual owner. jod

8/31/09: Loddo management hired Dutchess Environmental through Buy Rite Fuel to remove tank and initiate clean up of contaminated soil. That work started Dec 10 of 2008, and continued intermittently for approx 3 months. Dutchess Environmental has not submitted a closure report to date, stating they stopped work after Loddo failed to pay them for work performed to date. There was another incident of free product in the stream behind the property in early April. Attempts to contact Mr Loddo since that time have been unsuccessful.
Actual owner of property:
Paola Mangiacapra

Caller Remarks:

JIM HARDY WAS NOTIFIED AT TIME OF SPILL - WHILE REPLACING TANKS AND DIGGING FITTINGS FOR A NEW CANOPY CONTAMINATED SOIL WAS DISCOVERED

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "HARDY"
07/07/97 LETTER & STIPULATION AGREEMENT SENT;

04/17/01 LETTER SENT TO GEOLOGIC SERVICES BY J. HARDY; IMPROVED REMEDIATION ACTION PLAN REQUIRED WITHIN 60 DAYS.

06/07/01 LETTER SENT TO GEOLOGIC SERVICES BY J. HARDY; MW'S 6,9,10 AND 11 CAN BE REMOVED FROM THE MW NETWORK. MW3 MUST BE SAMPLED.

June '08 In response to the closure request in eDocs it was determined by DEC that no further remdiation was required of Shell at this time but that sampling of MWs needed to continue. An array of MWs more representative of GW conditions across the site were proposed for sampling by Shell and approved by DEC. PJD

Dec. '08 Received a QMR from Shell that includes the sampling of 6 wells, some of which are DEC wells installed for spill # 8605287. While this report states that an offsite vapor impact to Chase Bank was the result of a Sunoco/Barrier oil spill from the '86 time period this is not a DEC conclusion. Relatively severe impacts remain in two DEC MWs in the median of Rte 119 from the Sun/Barrier source which may contribute to the dissolved contaminants on the Shell station site. PJD

DEC Investigator Remarks:

PBS #3-496634
Prior to Sept, 2004 data translation this spill Lead_DEC Field was “WCHD-MAGNUSON”
08/12/03: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 7/17/2003. Tank closure report from Elite Env. Svcs. has been reviewed. Soil samples indicate contamination in excess of NYSDEC guidelines. Groundwater samples indicate groundwater has been impacted. WCDOH accepts proposed remediation plan, monitoring wells must be installed and sampled. First report to be submitted to WCDOH within 60 days and quarterly thereafter for a minimum of 1 year.

11/3/03: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 30Oct2003. Requested site assessment report and groundwater sampling results have not been received by WCDOH.

12/26/03: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 22dEC2003. Groundwater sampling results have been received and reviewed. Next sampling due on or about 31Jan2004.

2/23/04: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 18Feb2004. Groundwater samples from MW 1, 2, 3 and 6 have been reviewed. Wells 4 and 5 must also be sampled. Results are due to WCDOH by 15March2004.

5/18/04: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 13May2004. GW sampling results by Elite Environmental Services for samples collected 12Apr2004 have been reviewed. Next sampling due on or about 12Jul2004. Results to be submitted within 30 days of sampling.

9/01/04: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 10Aug2004. GW sampling results by Elite Environmental Services for samples collected 16Jul2004 have been reviewed. Next sampling due on or about 16Oct2004. Results to be submitted within 30 days of sampling.

4/4/05: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 24Mar2005. GW sampling results by Elite Environmental Services for samples collected 11Mar2005 have been reviewed. Next sampling due on or about 11Jun2005. Results to be submitted within 30 days of sampling.

8/10/05: Letter to Washington Irving Boat Club, Inc from Karen Magnuson, WCDOH, dated 3Aug2005. GW sampling results by Elite Environmental Services for samples collected 8Jul2005 have been reviewed. Next sampling due on or about 8Oct2005. Results to be submitted within 30 days of sampling.

03/08/2006 Letter Dated 12/20/2005 from Karen Magnuson to Washington Irving Boat Club, Inc. Groundwater samples taken were satisfactory. NFA Spill closed.

Spilled | Units |
PETROLEUM | 2.00 GALLONS |

Spill Date | Date Cleanup Ceased | Cause of Spill |
-----------|---------------------|----------------|
04/11/2004 | OTHER |

Caller Remarks:
Transformer was struck by lightening. 2 gallons of transformer oil leaked onto the soil.
Cleanup pending contractor crews to be assembled

DEC Investigator Remarks:
Prior to Sept, 2004 data translation this spill Lead_DEC Field was "MCCABE"
Material Spilled | Material Class | Quantity Spilled | Quantity Recovered | Resource(s) Affected
--- | --- | --- | --- | ---
#2 FUEL OIL | PETROLEUM | 0 GALLONS | 0 GALLONS | SOIL

**Caller Remarks:**

WHILE DOING TANK REMOVAL - CONTAMINATED SOIL WAS DISCOVERED

SOIL WILL BE SENT OUT FOR SAMPLING - THEN LIVE LOADED

**DEC Investigator Remarks:**

DEC on site for inspection 11-15-00. Stockpiled soil on site. More contaminated soil to be excavated. Followup inspections by DEC showed stockpiled soil had been removed and excavation backfilled. DEC made several calls to Dave Spelman of Clean Earth Environmental. He stated he believed the cleanup was complete, but he was awaiting soil sample results before sending a closure report. Additional calls in the following months were not returned. Company is no longer in business. Pending further information, spill file closed at this time.  jod

**Call for service # ...**

**DEC Investigator Remarks:**  
10/15/09: Harbor master reports gasoline slick in the Tarrytown Marina. He first notified NRC, report #920209. USCG notified. Tarrytown FD en route. County HazMat and Health Dept also notified. Marina shut down and inspected all fuel pumps. No indication the release came from there. Appears to be a sheen from the bilge from one of the boats. Sheen is dissipating and has not returned. No source identified.  
Additional reports received from other agencies. A second NRC Report #920215 was called in by Westchester Emergency Services. Reports that this is an ongoing release coming from Ames Creek were investigated and found to be erroneous. DEC Law Enforcement was also notified and will respond to inspect. I forwarded all available information to ECO Davies. I also spoke with Chris Lalak of WCDOH and his Dept will not need to respond.  
No product recoverable. Sheen has dissipated. NRC reports entered into eDocs. NFA jod

CLOSED STATUS HAZARDOUS SPILLS - MISC. SPILL CAUSES - EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, AND VANDALISM - IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS.

All spills mapped and profiled within 1/4 mile. Between 1/4 mile and 1/2 mile search radius, spills reported to be greater than 100 units and spills reported in the NYSDEC Fall 1998 MTBE Survey are mapped and profiled. Spills reported to be less than 100 units are listed in a table at the end of this section.

Please Note: * - Compass directions can vary substantially for sites located very close to the subject property address.

Hazardous waste codes presented in individual Toxic Information Profiles are defined below.

D001 Solid waste that exhibits the characteristic of ignitability, but is not listed under any other hazardous waste code.

D002 Solid waste that exhibits the characteristic of corrosivity, but is not listed under any other hazardous waste code.

D003 Solid waste that exhibits the characteristic of reactivity, but is not listed under any other hazardous waste code.

D004 Arsenic

D005 Barium

D006 Cadmium

D007 Chromium

D008 Lead

D009 Mercury

D010 Selenium

D011 Silver

D016 2,4-D, (2,4-Dichlorophenoxyacetic acid).

D022 Chloroform

D025 p-Cresol

D039 Tetrachloroethylene

F001 The following spent halogenated solvents used in degreasing: Tetrachloroethylene, trichloroethylene, methylene chloride, 1,1,1-trichloroethane, carbon tetrachloride, and chlorinated fluorocarbons; all spent solvent mixtures/blends used in degreasing containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those solvents listed in F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (T)

F002 The following spent halogenated solvents: Tetrachloroethylene, methylene chloride, trichloroethylene, 1,1,1-trichloroethane, chlorobenzene, 1,1,2-trichloro-1,2,2-trifluoroethane, ortho-dichlorobenzene, trichlorofluoromethane, and 1,1,2-trichloroethane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above halogenated solvents or those listed in F001, F004, or F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (T)

F003 The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl...
ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/blends containing, before use, only the above spent non-halogenated solvents; and all spent solvent mixtures/blends containing, before use, one or more of the above non-halogenated solvents, and, a total of ten percent or more (by volume) of one or more of those solvents listed in F001, F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (I)*

F005 The following spent non-halogenated solvents: Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, or F004; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (I,T)

F008 Plating bath residues from the bottom of plating baths from electroplating operations where cyanides are used in the process. (R, T)

F027 Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing Hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component.) (H)

P008 4-Aminopyridine
P030 Cyanides (soluble cyanide salts), not otherwise specified
P048 2,4-Dinitrophenol
P066 Methomyl
P075 Pyridine, 3-(1-methyl-2-pyrrolidinyl)-, (S)-, & salts
P098 Potassium cyanide
P105 Sodium azide
U001 Ethanal (I)
U002 Acetone (I)
U004 Acetophenone
U007 2-Propenamide
U021 [1,1-Biphenyl]-4,4-diamine
U028 1,2-Benzenedicarboxylic acid, bis(2-ethylhexyl) ester
U029 Methyl bromide
n-Butyl alcohol (I)  
Chloroform  
Cyclophosphamide  
Methane, dibromo-  
Methane, dichloro-  
2,6-Dichlorophenol  
Phenol, 2,4-dimethyl-  
Acetic acid ethyl ester (I)  
Ethyl ether (I)  
Formaldehyde  
Formic acid (C,T)  
Furfural (I)  
Hydrogen sulfide H2S  
Cacodylic acid  
Methane, iodo-  
Isobutyl alcohol (I,T)  
Lead acetate  
Thiophenol (I,T)  
Methyl alcohol (I)  
Naphthalene  
Phenol
U196  Pyridine
U228  Ethene, trichloro-
U279  Carbaryl (OR) 1-Naphthalenol, methylcarbamate
U404  Ethanamine, N,N-diethyl (OR) Triethylamine

How Toxic Site Locations Are Mapped

Toxics Targeting maps toxic site locations on a digital version of the U. S. Census map or those used by local authorities using addresses and map coordinates provided by site owners/operators or government agencies. In order to allow site locations to be verified independently, the information used to map each site is presented in the first section of each Toxic Site Profile, along with a description of the mapping technique used and any address corrections that were made in order to locate toxic sites with incomplete or inadequate site location information. The mapping process is explained below.

<table>
<thead>
<tr>
<th>MAP LOCATION INFORMATION</th>
<th>ADDRESS CHANGE INFORMATION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Site location mapped by:</td>
<td>Revised Street: NO CHANGE</td>
</tr>
<tr>
<td>Address Matching</td>
<td>Revised zip code: NO CHANGE</td>
</tr>
<tr>
<td>or Map Coordinate</td>
<td>4) Site addresses are sometimes corrected to eliminate obvious errors that prevent sites from being mapped. All address corrections are noted here.</td>
</tr>
<tr>
<td>or Manual Mapping</td>
<td>2) Some toxic sites are located using map coordinates provided by site owners/operators or government agencies. These site locations are identified “map coordinate.” Map coordinates for Toxic Wastewater Discharges, Toxic Release Inventory sites and Major Oil Storage Facilities should be considered suspect.</td>
</tr>
<tr>
<td>or Site Visit</td>
<td>3) Incomplete addresses or map coordinates require some site locations to be determined by commercial street maps (manual mapping), site visits, map coordinates from other databases and address location services. Application of any of these methods is identified accordingly.</td>
</tr>
</tbody>
</table>

Map Identification Number: 12
Site Address: 55 Main Street
Anytown, NY 11797
Map Name: Acme World Manufacturing, Inc.

1) Most toxic sites are mapped by matching addresses provided by site owners/operators or government agencies with locations on a digital version of the street or parcel map. These site locations are identified with the method used to map them.

Note: Some sites have an address match location and a map coordinate location. Both locations are mapped because they can be equally correct.
Information Source Guide

Toxics Targeting’s Environmental Reports contain government and other information compiled on 18 categories of reported known or potential toxic sites. Each toxic site database is described below with information detailing a) the source of the information, b) the date when each database is covered to and c) when Toxics Targeting obtained the information.

1) **National Priority List for Federal Superfund Cleanup:** Toxic sites nominated for cleanup under the Federal Superfund program. Annual compilation of special two-page detailed profiles of NPL sites. Also includes delisted NPL sites.
   - **Source:** U.S. Environmental Protection Agency. 1
   - **Data attributes updated from:** 8/1/2011
   - **New Facilities updated through:** 8/1/2011

2) **Inactive Hazardous Waste Disposal Site Registry:** New York State database that maintains information and aids decision making regarding the investigation and cleanup of toxic sites. The Registry's data includes two-page profiles noting site name, ID number, description, classification, cleanup status, types of cleanup, owner information, types and quantities of contaminants, and assessment of health and environmental problems. Also included are sites that qualify for possible inclusion on the Registry. These Registry Qualifying sites may or may not be on the Site Registry.
   - **Source:** New York State Department of Environmental Conservation. 2
   - **Data attributes updated through:** 9/28/2011
   - **New Facilities updated through:** 9/28/2011

3) **Corrective Action Activity (CORRACTS):** U.S. Environmental Protection Agency database of hazardous facilities regulated pursuant to the Resource Conservation and Recovery Act (RCRA).
   - **Source:** U.S. Environmental Protection Agency. 1
   - **Data attributes updated through:** 9/13/2011
   - **New facilities updated through:** 9/13/2011

4) **CERCLIS:** Toxic sites listed in the Federal Comprehensive Environmental Response, Compensation and Liability Information System. Includes Active and No Further Remedial Action Planned (NFRAP) sites.
   - **Source:** U.S. Environmental Protection Agency. 1
   - **Data attributes updated through:** 9/13/2011
   - **New facilities updated through:** 9/13/2011

5) **Brownfield Programs:** NYS programs for sites that are abandoned, idled or under-used industrial and/or commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.
   - **Source:** New York State Department of Environmental Conservation. 2
   - **Data attributes updated through:** 9/28/2011
   - **New Facilities updated to:** 9/28/2011
     - **(a) Brownfield Cleanup Program (BCP)**
     - **(b) Voluntary Cleanup Program (VCP)**
     - **(c) Environmental Restoration Program (ERP)**

6) **Solid Waste Facilities:** NYS Solid Waste Registry, including, but not limited to, landfills, incinerators, transfer stations, recycling centers.
   - **Source:** New York State Department of Environmental Conservation. 2
   - **Data updated to:** 12/31/2001

7) **RCRA Hazardous Waste Treatment, Storage or Disposal Facility Databases:**
     - **Source:** New York State Department of Environmental Conservation. 2
     - **New facilities updated through:** 9/13/2011
     - **Manifest transactions data updated to:** 9/13/2011
   - **(b) RCRA Notifier & Violations Information:** U.S. Environmental Protection Agency database of hazardous facilities regulated pursuant to the Resource Conservation and Recovery Act (RCRA).
     - **Source:** U.S. Environmental Protection Agency. 1
     - **New facilities updated through:** 9/13/2011
     - **Data attributes updated through:** 9/13/2011
8) **Spills Information Database:** Spills reported to the DEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from Petroleum Bulk Storage Regulations) or 6 NYCRR Section 595.2 (from Chemical Bulk Storage Regulations). This database includes both *active* and *closed* spills.

ASTM required.* Fannie Mae required.** Source: New York State Department of Environmental Conservation.2

New spills through: 7/22/2011
Spill attribute data through: 10/18/2011

Active spills: paperwork not completed.
Closed spills: paperwork completed.
Both active and closed spills may or may not have been cleaned up (see Date Cleanup Ceased in spill profiles).

9) **Major Oil Storage Facilities:** NYS database of facilities licensed pursuant to Article 12 of the Navigation Law, 6NYCRR Parts 610 and 17NYCRR Part 30, such as onshore facilities or vessels, with petroleum storage capacities equal to or greater than 400,000 gallons.

ASTM required.* Fannie Mae required.** Source: New York State Department of Environmental Conservation.2

Data updated through: 9/19/2011.
Data obtained by Toxics Targeting: 9/19/2011.

10) **Petroleum Bulk Storage Facilities:** County or State databases of aboveground and underground petroleum storage facilities.

ASTM required.* Fannie Mae required.**

All New York Counties except Cortland, Nassau, Rockland, Suffolk:

NYS Petroleum Bulk Storage Database. This includes all New York State counties except Cortland, Nassau, Rockland, Suffolk, and Westchester.

Source: New York State Department of Environmental Conservation.2

New facilities updated through: 9/19/2011.
Tank data updated through: 9/19/2011.

Westchester County: Data updated through 10/1/1998

Cortland County: Cortland County Health Dept. Tank database.

Source: Cortland County Health Department7

Nassau County: a compilation of the following 2 databases:

Heat producing products and other products:
Source: Nassau County Department of Health.3
NOTE: This data is being withheld by the Nassau County DOH
Data obtained by Toxics Targeting: 1/2/2002

Generally non-heat producing products:
Source: Nassau County Fire Marshal.4
Data updated through: 8/6/2009.
Data obtained by Toxics Targeting: 9/22/2009

Rockland County: Rockland County Dept. of Health Tank database.
Source: Rockland County Department of Health.5
Data obtained by Toxics Targeting: 4/16/2004.

Suffolk County: Suffolk County Dept. of Health Article 12 database
Source: Suffolk County Department of Health Services.6
Data obtained by Toxics Targeting: 7/12/2006.

11) **RCRA Hazardous Waste Generators and/or Transporters Databases:**

(a) Manifest Information: New York State database of hazardous waste facilities and shipments regulated by the NYS Department of Environmental Conservation’s Bureau of Hazardous Waste Facility Compliance pursuant to New York State Law.

ASTM required.* Fannie Mae required.** Source: New York State Department of Environmental Conservation.2

Manifest transactions data updated to: 9/13/2011.
Manifest transactions data obtained by Toxics Targeting: 10/4/2011.
12) **Chemical Bulk Storage Facilities:** New York State database of facilities compiled pursuant to 6NYCRR Part 596 that store regulated substances listed in 6NYCRR Part 597 in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

ASTM required.* Fannie Mae required.**
Data updated through: 9/19/2011.

Tank and other data withheld by NYSDEC as of 4/1/2002.

Data obtained by Toxics Targeting: 9/19/2011.

13) **Hazardous Substance Waste Disposal Site Study:** NYS database of waste disposal sites that may pose threats to public health or the environment, but could not be remediated using monies from the Hazardous Waste Remedial Fund.

Source: New York State Department of Environmental Conservation.2
Data updated to: 5/16/2000.
Data obtained by Toxics Targeting: 5/16/2000.

14) **Toxic Release Inventory (TRI):** Federal database of manufacturing facilities required under Section 313 of the Federal Emergency Planning and Community Right-to-Know Act to report releases to the air, water and land of any specifically listed toxic chemical. See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.1 / NYS Department of Environmental Conservation2
Data obtained by Toxics Targeting: 3/25/2004

15) **Toxic Wastewater Discharges (Permit Compliance System):** Federal database of discharges of wastewater to surface waters and groundwaters. See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.1
Data obtained by Toxics Targeting: 7/19/2004.

16) **Air Discharge Facilities:** EPA AIRS database containing address information on each air emission facility and the type of air pollutant emission it is. Compliance information is also provided on each pollutant as well as the facility itself.

See Fannie Mae requirement** below.
Source: U. S. Environmental Protection Agency1
Data obtained by Toxics Targeting: 1/6/2000

17) **Civil Enforcement & Administrative Docket:** This database is the U. S. EPA's system for tracking administrative and civil judiciary cases filed on behalf of the agency by the Department of Justice. Fannie Mae required.**

Source: U. S. Environmental Protection Agency.1
New Sites through: 10/14/1999.
Data updated through: 10/14/1999.
Data obtained by Toxics Targeting: 11/18/1999.

ASTM required.* See Fannie Mae requirement** below.
Source: U. S. Environmental Protection Agency.1
Data obtained by Toxics Targeting: 2/15/2000

** Fannie Mae's Part X Environmental Hazards Management Procedures specify 1.0 mile searches for "any state or Federal list of hazardous waste sites (e.g. CERCLIS, HWDMs etc.)." Searches for the property and adjacent properties are specified for "chemical manufacturing plants," "obvious high risk neighbors engaging in storing or transporting hazardous waste, chemicals or substances" and "...any documented or visible evidence of dangerous waste handling... (e.g. stressed vegetation, stained soil, open or leaking containers, foul fumes or smells, oily ponds, etc." Searches for property and adjacent properties can include sites up to a quarter mile away (W. Hayward, Director, Multi-Family Business Planning and Control, Fannie Mae, personal communication, 5/94).

1U. S. Environmental Protection Agency, 290 Broadway, NY, NY 10007-1866.
2NYS Department of Environmental Conservation, 625 Broadway, Albany, NY 12233.
3Nassau County Department of Health, Bureau of Land Resources Management, 240 Old Country Road, Mineola, NY 11501.
4Nassau County Fire Commission, Office of the Fire Marshal, 899 Jerusalem Avenue, P. O. Box 128, Uniondale, NY 11553.
5Rockland County Department of Health, The Dr. Robert Yeager Health Center, Building D, Sanitorium Road, Pomona, NY 10970.

LIMITED WARRANTY AND DISCLAIMER OF LIABILITY

Who is Covered

This limited warranty is extended by Toxics Targeting, Inc. only to the original purchaser of the accompanying Environmental Report ("Report"). It may not be assigned to any other person.

What is Warranted

Toxics Targeting, Inc. warrants that it uses reasonable care to accurately transcribe the information contained in this Report from the sources from which it is obtained. This limited warranty is in lieu of all other express warranties which might otherwise arise with respect to the Report. No one is authorized to change or add to this limited warranty.

What We Will Do

If during the warranty period there is shown to be a material error in the transcription of the information contained in this Report from the sources from which it was obtained, Toxics Targeting, Inc. shall refund to the original purchaser the full purchase price paid for the Report. The remedy stated above is the exclusive remedy extended to the Purchaser by Toxics Targeting, Inc. for any failure of the Report to conform with this Warranty, or otherwise for breach of this Warranty or any other warranty, whether expressed or implied.

What We Won’t Cover

Toxics Targeting, Inc. has not and can not verify the accuracy, correctness or completion of the information contained in this Report. Information is obtained from government agencies, site owners, and other sources, and errors are common in such information. Because Toxics Targeting, Inc. can not control the accuracy of the information contained in this Report, or the uses which may be made of the information, TOXICS TARGETING, INC. DISCLAIMS LIABILITY TO ANYONE FOR ANY EVENTS ARISING OUT OF THE USE OF THE INFORMATION. TOXICS TARGETING, INC. SHALL NOT BE LIABLE FOR ANY DAMAGE CAUSED BY THIS REPORT, WHETHER DIRECT OR INDIRECT, AND WHETHER OR NOT TOXICS TARGETING, INC. HAS BEEN ADVISED OF OR HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES. TOXICS TARGETING, INC. EXPRESSLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

Period of Warranty

The period of warranty coverage is ninety days from the date of purchase of this Report. There shall be no warranty after the period of coverage. ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR USE SHALL HAVE NO GREATER DURATION THAN THE PERIOD OF WARRANTY STATED HERE, AND SHALL TERMINATE AUTOMATICALLY UPON THE EXPIRATION OF SUCH PERIOD. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you.

PLEASE REFER TO PAGES ONE AND FIVE FOR A DESCRIPTION OF SOME OF THE LIMITATIONS OF THIS ENVIRONMENTAL REPORT.
Introduction

Toxics Targeting has combined environmental database searches, extensive regulatory analysis and sophisticated mapping techniques to produce your Environmental Report. It checks for the presence of 21 categories of government-reported toxic sites and provides detailed, up-to-date information on each identified site. The findings of your report are presented in an easy-to-understand format that:

1. **Maps** the approximate locations of selected government-reported toxic sites identified on or near a specified target address.

2. **Estimates** the distance and direction between the target address and each identified toxic site.

3. **Reports** air and water permit non-compliance and other regulatory violations.

4. **Profiles** some aspects of the usage, manufacture, storage, handling, transport or disposal of toxic chemicals at individual sites.

5. **Summarizes** some potential health effect information and drinking water standards for selected chemicals reported at individual sites.

The Three Sections Of Your Report

The first section highlights your report's findings by summarizing identified sites according to: a) distance intervals, b) direction, c) proximity to the target address and d) individual site categories. In addition, the locations of all identified toxic sites are illustrated on individual maps for each radius search distance used in your report. A close-up map illustrates the locations of all identified toxic sites, at the shortest radius search distance used in your report. Finally, a map of tax parcels and a table of selected information about those parcels are included.

The second section of your report contains Toxic Site Profiles that provide detailed information on each identified toxic site. The information in each Toxic Site Profile varies according to its source. Some toxic site categories have extensive information, some have limited information. All the information is updated on a regular basis.

The third section of the report contains appendices that identify: 1) on-site spills reported to the national Emergency Response Notification System (ERNS), 2) various toxic sites that cannot be mapped due to incomplete or erroneous addresses or other mapping problems, 3) codes that characterize hazardous wastes reported at various facilities, 4) methods used to map toxic sites identified in your report and 5) information sources used in your report.

How to Use Your Report

- Check Table One to see the number of identified sites by distance intervals.

- Check Table Two to see identified sites sorted by direction.

- Check Table Three to see identified sites sorted by site categories.

- Check Table Four to see identified sites ranked by proximity to the target address.

- Use Table Five to get info for the subject parcel and every parcel found on the Tax Parcel Map

- Refer to the various maps to see the locations of identified toxic sites. Refer to the Toxic Site Profile and Appendix sections for additional information.
Toxic Site Databases Analyzed In Your Report

Search Radius

One-Mile

1) National Priority List for Federal Superfund Cleanup: a listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program.

Half-Mile

2) Delisted National Priority List Sites: a listing of NPL sites that have been removed from the National Priority List.

One-Mile

3) New York Inactive Hazardous Waste Disposal Site Registry: a state listing of sites that can pose environmental or public health hazards requiring investigation or clean up.

One-Mile

One-Mile

5) RCRA Corrective Action Activity (CORRACTS): waste facilities with RCRA corrective action activity reported by the USEPA.

Half-Mile

6) CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System): a federal listing of Non-NFRAP sites that can pose environmental or public health hazards requiring investigation or clean up.

Half-Mile

7) CERCLIS NFRAP: a federal listing of CERCLIS sites that have no further remedial action planned.

Half-Mile

8) New York State Brownfield Cleanup Sites: a listing of sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Half-Mile

9) New York Solid Waste Facilities Registry: active and inactive landfills, incinerators, transfer stations or other solid waste management facilities.

Half-Mile

10) New York and Federal Hazardous Waste Treatment, Storage or Disposal Facilities: sites reported by the NYS manifest system and the USEPA’s Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following database:

- RCRA violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.
11) **Toxic Spills**: active and inactive or closed spills reported to state environmental authorities, including remediated and unremediated leaking underground storage tanks. This database includes the following categories:

- Tank Failures
- Tank Test Failures
- Unknown Spill Cause or Other Spill Causes
- Miscellaneous Spill Causes

12) **New York State Major Oil Storage Facilities**: sites with more than a 400,000-gallon capacity for storing petroleum products.

13) **New York and Local Petroleum Bulk Storage Facilities**: sites with more than a 1,100-gallon capacity for storing petroleum products.

14) **New York and Federal Hazardous Waste Generators and Transporters**: sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRA). Also includes the following database:

- **RCRA violations**: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

15) **New York Chemical Bulk Storage Facilities**: sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size

16) **New York Hazardous Substance Disposal Site Draft Study**: a state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites are not eligible for state clean up funding programs.

17) **Federal Toxic Release Inventory Facilities**: discharges of selected toxic chemicals to air, land, water or treatment facilities.

18) **Federal Air Discharges**: Air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies.

19) **Federal Permit Compliance System Toxic Wastewater Discharges**: permitted toxic wastewater discharges.

20) **Federal Civil and Administrative Enforcement Docket**: judiciary cases filed on behalf of the U.S. Environmental Protection Agency by the Department of Justice.
21) **ERNS: Federal Emergency Response Notification System Spills**: a listing of federally reported spills.
Limitations Of The Information In Your Report

The information presented in your Environmental Report has been obtained from various local, state and federal government agencies. Please be aware that: 1) additional information on individual sites may be available, 2) newly discovered sites are continually reported and 3) all map locations are approximate. As a result, this report is intended to be the FIRST STEP in the process of identifying and evaluating possible environmental threats to specific properties and can only serve as a guide for conducting on-site visits or additional, more detailed toxic hazard research.

Toxics Targeting tries to ensure that the information in your report is presented accurately and with minimal alteration. The only systematic changes that are made correct obvious address errors in order to allow sites to be mapped. Any address changes that are made are noted in the map information section at the top of each corresponding Toxic Site Profile. Since the information presented in your report is not edited, please be aware that it can contain reporting errors or typographical mistakes made by the site owners/operators or government agencies that produced the information. Please be aware of some other limitations of the information in your report:

- The map used by Toxics Targeting is the same one used by the U. S. Census. While the map is generally accurate, no map is perfect. In addition, Toxics Targeting's mapping methods estimate where toxic site addresses are located if the address is not specifically designated on the Census map. FOR THESE REASONS, ALL MAP LOCATIONS OF ADDRESSES AND REPORTED TOXIC SITES SHOULD BE CONSIDERED APPROXIMATE AND SHOULD BE VERIFIED BY ON-SITE VISITS;

- UNDISCOVERED, UNREPORTED OR UNMAPPABLE TOXIC SITES MIGHT NOT BE IDENTIFIED BY THIS REPORT'S CHECK OF 21 TOXIC SITE CATEGORIES. TOXIC SITES REPORTED IN OTHER GOVERNMENT DATABASES MIGHT ALSO EXIST. FOR THESE REASONS, YOUR REPORT MIGHT NOT IDENTIFY ALL THE TOXIC SITES THAT EXIST IN THE AREA IT SEARCHES;

- The appendix of your report contains a listing of sites that could not be mapped due to incomplete or erroneous address information or other mapping problems. This listing includes unmappable toxic sites in zip code areas within one mile of the target address as well as toxic sites without zip codes reported in the same county. IF YOU WOULD LIKE INFORMATION ON ANY OF THE LISTED SITES, PLEASE CONTACT TOXICS TARGETING AND REFER TO THE SITE ID NUMBER.

- Some toxic sites identified in your report may be classified as known hazards. Most of the toxic sites identified in your report involve potential hazards related to the on-site use, manufacture, handling, storage, transport or disposal of toxic chemicals. Some of the toxic sites identified in your report may be the addresses of parties responsible for toxic sites located elsewhere. YOU SHOULD ONLY CONCLUDE THAT TOXIC HAZARDS ACTUALLY EXIST AT A SPECIFIC SITE WHEN GOVERNMENT AUTHORITIES MAKE THAT DETERMINATION OR WHEN THAT CONCLUSION IS FULLY DOCUMENTED BY THE FINDINGS OF AN APPROPRIATE SITE INVESTIGATION UNDERTAKEN BY LICENSED PROFESSIONALS;

- Compass directions and distances are approximate. Compass directions are calculated from the subject property address to the mapped location of each identified toxic site. The compass direction does not necessarily refer to the closest property boundary of an identified toxic site. The compass direction also can vary substantially for toxic sites that are located very close to the subject property address.

- The information presented in your report is a summary of the information that Toxics Targeting obtains from government agencies on reported toxic sites. YOU MAY BE ABLE TO OBTAIN ADDITIONAL INFORMATION ABOUT REPORTED SITES WITH THE FREEDOM OF INFORMATION REQUEST FORM LETTERS THAT ARE PROVIDED ON THE INSIDE OF THE BACK COVER.
Section One:

Report Summary

Waterbody

County Border
1/4 Mile Radius
1/8 Mile Radius

Scale: 1 inch = 1296 feet
Section Two: Toxic Site Profiles

The heading of each Toxic Site Profile refers to the site's map location and details:

- The facility name, address, city, state, and zip code.
- Any changes that were made to a site's address in order to map its location.
- The site mapping method that was used (see How Sites are Located, at the end of this section for more information).

Toxic Site Profiles summarize information provided by site owners or operators and government agencies regarding various toxic chemical activities reported at each site, such as:

- Whether chemicals were stored, produced, transported, discharged or disposed of.
- The name of chemicals and their Chemical Abstract Series (CAS) numbers.
- The amount of chemicals and the units (gallons/pounds) the chemical was measured in.
- Whether the site or storage tanks at the site are currently active or inactive.
- Special codes used by government agencies to regulate hazardous waste activities at some sites, or a complete description of the codes follows the profiles section.

For selected individual chemicals reported at various toxic sites, some potential health effect summary information appears below the site profile. Each potential health effect summary identifies chemicals by name and by Chemical Abstract Series (CAS) Number. An "x" under each potential health effect heading indicates positive toxicity testing results reported by the National Institute of Occupational Safety and Health's Registry of Toxic Effects of Chemical Substances (RTECS). Some chemicals (mostly appearing in profiles of Hazardous Waste facilities), are reported as mixtures, and RTECS health effect information is only available for individual chemicals. In addition, RTECS only provides information on approximately 100,000 common chemicals. Consequently, the absence of potential health effect summary information for a particular chemical identified in a Toxic Site Profile does not necessarily mean that the chemical does not pose potential health effects.

The Maximum Contaminant Level (MCL) in drinking water allowed for selected chemicals is also noted. In most cases, the only applicable MCL has been set by the New York State Department of Health (NYSDOH). Where NYSDOH has not set an MCL, the federal standard, if one exists, is listed and is marked by an asterisk.

Presented below are column headings that describe the health effect definitions used in RTECS and applicable New York State and federal drinking water standards. Reference sources for information presented in this section are also provided.

ACUTE TOX: **Acute Toxicity**: Short-term exposure to this chemical can cause lethal and non-lethal toxicity effects not included in the following four categories.

TUMOR TOX: **Tumorigenic Toxicity**: The chemical can cause an increase in the incidence of tumors.
MUTAG TOX: **Mutagenic Toxicity**: The chemical can cause genetic alterations that are passed from one generation to the next.

REPRO TOX: **Reproductive Toxicity**: May signify one of the following effects: maternal effects, paternal effects, effects on fertility, effects on the embryo or fetus, specific developmental abnormalities, tumorigenic effects, or effects on the newborn (only positive reproductive effects data for mammalian species are referenced).

IRRIT TOX: **Primary Irritant**: The chemical can cause eye or skin irritation.

MCL: **Drinking Water Standard - Maximum Contaminant Level** (MCL) listed under Drinking Water Supplies, 10 NYCRR Part 5, Subparts 1.51(f),(g), and (h) for NYDOH MCL's and under the Safe Drinking Water Act, 40 CFR 141, Subparts B and G, (* indicates value for total trihalomethanes) for federal MCL's.

Reference Source for Toxicity Information: Registry of Toxic Effects of Chemical Substances (RTECS), NIOSH (on-line database); For further information, contact: NIOSH, 4676 Columbia Parkway, Cincinnati, OH, 45226, 800/35-NIOSH.

Inactive Hazardous Waste Disposal Site Classifications: 1 -- Causinsg or presenting an imminent danger of causing irreversible or irreparable damage to the public health or the environment -- immediate action required; 2 -- Significant threat to the public health or environment -- action required; 3 -- Does not Present a significant threat to the environment of public health -- action may be deferred; 4 -- Site properly closed --requires continued management; 5 -- Site properly closed, no evidence of present or potential adverse impact -- no further action required; 2a -- This temporary classification has been assigned to sites where there is inadequate data to assign them to the five classifications specified by law; A -- Work underway and not yet complete; P -- Potential Site; D1, 2, 3 -- Delisted Site (1: hazardous waste not found; 2: remediated; 3: consolidated site or site incorrectly listed); C -- Remediation Complete (formerly D2).
NO NATIONAL PRIORITIES LIST (NPL) SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS
NO INACTIVE HAZ WASTE DISPOSAL REGISTRY OR REGISTRY-QUALIFYING SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS
NO RCRA CORRECTIVE ACTION SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS
NO CERCLIS SUPERFUND SITES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO BROWNFIELDS SITES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO SOLID WASTE FACILITIES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO HAZARDOUS WASTE TREATMENT/STORAGE/DISPOSERS IDENTIFIED WITHIN THE 1/2 MILE SEARCH RADIUS
HAZARDOUS MATERIAL SPILLS INTRODUCTION

The Hazardous Material Spills in this section are divided into eight spill cause groupings. These include:

Active Spills Section: Spills with incomplete paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

1) Tank Failures
2) Tank Test Failures
3) Unknown Spill Cause or Other Spill Cause Hazardous Spills

Closed Status Spills Section: Spills with completed paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

5) Tank Failures
6) Tank Test Failures
7) Unknown Spill Cause or Other Spill Cause Hazardous Spills

All spills within each spill cause category are presented in order of proximity to the subject site address.

Please note that spills reported within 0.25 mile (or one-eighth mile in New York City) are mapped and profiled.

Between 0.25 mile (or one-eighth mile in New York City) and 0.5 mile, only the following spills are mapped and profiled:

* Tank Failures;
* Tank Test Failures;
* Unknown Spill Cause or Other Spill Cause;
* Spills greater than 100 units of quantity; and
* Spills reported in the NYSDEC Fall 1998 MTBE Survey.

A table at the end of each section presents a listing of reported Miscellaneous Spills with less than 100 units located between 0.25 mile (or one-eighth mile in Manhattan) and 0.5 mile. These spills are neither mapped nor profiled.
NO ACTIVE TANK FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO ACTIVE TANK TEST FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO ACTIVE UNKNOWN CAUSE SPILLS AND OTHER CAUSE SPILLS IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO ACTIVE HAZARDOUS SPILLS - MISC. SPILL CAUSES - EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, AND VANDALISM - IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS.

All spills mapped and profiled within 1/4 mile. Between 1/4 mile and 1/2 mile search radius, spills reported to be greater than 100 units and spills reported in the NYSDEC Fall 1998 MTBE Survey are mapped and profiled. Spills reported to be less than 100 units are listed in a table at the end of this section.

THE FOLLOWING ACTIVE SPILLS FOR THIS CATEGORY WERE REPORTED BETWEEN 1/4 MILE AND 1/2 MILE SEARCH RADIUS FROM THE SUBJECT ADDRESS. THESE SPILLS WERE REPORTED TO BE LESS THAN 100 UNITS IN QUANTITY AND CAUSED BY: EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, OR VANDALISM. THESE SPILLS ARE NEITHER MAPPED NOR PROFILED IN THIS REPORT.

**Clean Ventures hired and is expected onsite shortly, awaiting conformation of arrival to site. Clean up effort being originizined out of docks in Nyack.**
8-5-09: T.G. ^V.Mc.: Clean Ventures is a capable contractor for handleing clean up.
8-5-09: Dan Sullivan/RCHD ^ V.Mc./Dispt.: Dan to site inspect.
8-5-09: Dan Sullivan/RCHD ^ V.Mc./Dispt.: Dan Sul.Site inspec.: contractor bagging spent sorbent. Dan Sul. to contact Perini Comp. & Clean Ventures, for update of situsation on River. Dan at dock, & has not gotten a chance to get on river yet.
8-5-09: Dan Sullivan/RCHD ^ V.Mc./Dispt.: Dan Sul.Site inspec.: Est. total loss at 375 gal.of which 75 gal.is still in tank.
Double walled AST, unk why if started to leak, around 11:15AM this morning. USCG arrived on site, by CAR, around 15:50, and will go by boat to inspect. river, barge & clean up. Photos taken and will be e-mailed to J.O’D. Clean Ventures has not arrived on site yet, coming out of NJ, they will likely handle emptying the tank & removal from service.

8/6/09: Update from Dan Sullivan:
“Upon discovery of the leak Perini personnel immediately built a berm around the Konex box attempting to contain the leak at that point and simultaneously deployed booms to the river attempting to contain the product that had already made it off the barge and into the river. It seems to me that Perini personnel responded swiftly to the leaking tank. The leak eventually stopped when the level of diesel fell below the hole in the tank. The total amount of diesel lost was approximately 375 gallons with approximately 300 gallons remaining in the annular space of the double wall tank and 75 gallons being released.” jod
**Caller Remarks:**

Tow truck transporting a City of Yonkers Police car had a mechanical break down - dropped police car in center span. Police car then struck by a tractor trailer. Gasoline from Police car and anti-freeze and coolant from tractor trailer spilled to roadway. Small amount may have reached Hudson River. DEC on site with State Police and Thruway Authority.

**DEC Investigator Remarks:**

7/22/09: Thruway Authority put down speedi-dry, in process of sweeping it up and drumming it for disposal. jod
DEC Investigator Remarks:

05/11/2009: Approx. 75 gals of diesel fuel spilled to bridge leaving 1/2 mile trail on road. Most spilled to the Hudson River below the rest has been cleaned up by the Bridge Crews. USCG was informed...NFA/Closed...ra

Caller Remarks:
01/24 The caller advised dispatch the spill amount was 180 gallons. Diesel fuel spilled onto the Hudson River from the TappanZee Bridge.

DEC Investigator Remarks:
02/24/09: Approx 250 gals of diesel spilled from two saddle tanks off a FedEx truck. K. Browne responded early this morning and EP&S is doing the clean up. It is unknown if any fuel got into any waterways near the Hudson. J. O'Dee will go and check the spill today. One Sueann Angle, of FedEx National, was/is the contact (501/351-7996)...ra

02/24/2009 - RP contracted mechanics to repair the tracker trailer and a clean up contractor to cleanup the spill. The mechanics
were unable to stop the leak or repair the vehicle. The cleanup contractor was Environmental Products & Services of Vermont, Inc. (EP&S of VT). There was a rip in the left saddle tank which was losing diesel fuel at 1/4 gal. per min. The saddle tanks were connected though a crossover connection with no shut off. The right saddle tank was siphoning into the left tank. Therefore the diesel fuel loss was the capacity of both saddle tanks. The speedy dry berm contacted the majority of the diesel but some diesel went into a storm drain. EP&S of VT had a drum vacuum, speedy dry, and a vac truck. Saddle tanks were to be emptied. Pooled diesel and impacted speedy dry will be removed and roadway cleaned. The vac truck will be used to remove diesel from storm drain.

### Caller Remarks

One truck accident, both saddle tanks ruptured. Fire dept (nyack) on scene, also Rockland co HAZMAT. Clean up in progress.

### DEC Investigator Remarks

USCG notified. Dave Weitz responded. D. Weitz responded after-hours. NYSTA doing cleanup of road. Good portion of spill went off bridge, and into Hudson River, which was unrecoverable. USCG came to check site out. NYSP closed eastbound lanes while cleanup was going on. Driver of truck ran into side rail, when he dropped crackers in the truck. He was not hurt. Spill was cleaned up, and road was reopened at approx. 5am.
NFA
**Tractor Trailer Accident: Rollover, Fire Co., NYS THURWAY Were on Scene, All Cleaned Bridge is Closed Due to Accident and Wind:**

01/18/2006  J. McCarthy spoke w Sgt. Antonelli (NYSP Tarrytown) affirmed there was a tractor trailer flipped over on the Tappan Zee Bridge & unknown quantity of diesel (100 gallons?) was spilled. Speedi dri was put down and some diesel washed into River. Major rain, wind gust event going on. Further cleanup options not available. NFA

**Caller Remarks:**

perry transport is onwer of tractor trailer. saddle tank leaking after tire blew out. looking for a response. sgt will contact coast guard.

**DEC Investigator Remarks:**

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "GHIOSAY"

7-28-03 Thruway personnel applied sand to the spill and collected the material with a street sweeper. Thruway will handle disposal. Heather Garrison of the Thruway handled the spill.

THE FOLLOWING CLOSED SPILLS FOR THIS CATEGORY WERE REPORTED BETWEEN 1/4 MILE AND 1/2 MILE FROM THE SUBJECT ADDRESS. THESE SPILLS WERE REPORTED TO BE LESS THAN 100 UNITS IN QUANTITY AND CAUSED BY: EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, OR VANDALISM. THESE SPILLS ARE NEITHER MAPPED NOR PROFILED IN THIS REPORT.

Hazardous waste codes presented in individual Toxic Information Profiles are defined below.

D001  Solid waste that exhibits the characteristic of ignitability, but is not listed under any other hazardous waste code.

D002  Solid waste that exhibits the characteristic of corrosivity, but is not listed under any other hazardous waste code.

D003  Solid waste that exhibits the characteristic of reactivity, but is not listed under any other hazardous waste code.

D007  Chromium

D008  Lead

D039  Tetrachloroethylene

F003  The following spent non-halogenated solvents: Xylene, acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, n-butyl alcohol, cyclohexanone, and methanol; all spent solvent mixtures/blends containing, before use, only the above spent non-halogenated solvents; and all spent solvent mixtures/blends containing, before use, one or more of the above non-halogenated solvents, and, a total of ten percent or more (by volume) of one or more of those solvents listed in F001, F002, F004, and F005; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (I)*

F005  The following spent non-halogenated solvents: Toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, benzene, 2-ethoxyethanol, and 2-nitropropane; all spent solvent mixtures/blends containing, before use, a total of ten percent or more (by volume) of one or more of the above non-halogenated solvents or those solvents listed in F001, F002, or F004; and still bottoms from the recovery of these spent solvents and spent solvent mixtures. (I,T)

F008  Plating bath residues from the bottom of plating baths from electroplating operations where cyanides are used in the process. (R, T)

How Toxic Site Locations Are Mapped

Toxics Targeting maps toxic site locations on a digital version of the U.S. Census map or those used by local authorities using addresses and map coordinates provided by site owners/operators or government agencies. In order to allow site locations to be verified independently, the information used to map each site is presented in the first section of each Toxic Site Profile, along with a description of the mapping technique used and any address corrections that were made in order to locate toxic sites with incomplete or inadequate site location information. The mapping process is explained below.

Map Identification Number: 12
Site Name: Acme World Manufacturing, Inc.
Site Address: 55 Main Street
Anytown, NY 11797

MAP LOCATION INFORMATION

Site location mapped by:
Address Matching

1) Most toxic sites are mapped by matching addresses provided by site owners/operators or government agencies with locations on a digital version of the street or parcel map. These site locations are identified with the method used to map them.

2) Some toxic sites are located using map coordinates provided by site owners/operators or government agencies. These site locations are identified "map coordinate." Map coordinates for Toxic Wastewater Discharges, Toxic Release Inventory sites and Major Oil Storage Facilities should be considered suspect.

3) Incomplete addresses or map coordinates require some site locations to be determined by commercial street maps (manual mapping), site visits, map coordinates from other databases and address location services. Application of any of these methods is identified accordingly.

Note: Some sites have an address match location and a map coordinate location. Both locations are mapped because they can be equally correct.

or Map Coordinate

or Manual Mapping
or Site Visit

ADDRESS CHANGE INFORMATION

Revised Street: NO CHANGE
Revised zip code: NO CHANGE

4) Site addresses are sometimes corrected to eliminate obvious errors that prevent sites from being mapped. All address corrections are noted here.
Information Source Guide

Toxics Targeting’s Environmental Reports contain government and other information compiled on 18 categories of reported known or potential toxic sites. Each toxic site database is described below with information detailing a) the source of the information, b) the date when each database is covered to and c) when Toxics Targeting obtained the information.

1) National Priority List for Federal Superfund Cleanup: Toxic sites nominated for cleanup under the Federal Superfund program. Annual compilation of special two-page detailed profiles of NPL sites. Also includes delisted NPL sites.
   - ASTM required.* Fannie Mae required.**  Source: U. S. Environmental Protection Agency 1
   - Data attributes updated from: 8/1/2011.

2) Inactive Hazardous Waste Disposal Site Registry: New York State database that maintains information and aids decision making regarding the investigation and cleanup of toxic sites. The Registry's data includes two-page profiles noting site name, ID number, description, classification, cleanup status, types of cleanup, owner information, types and quantities of contaminants, and assessment of health and environmental problems. Also included are sites that qualify for possible inclusion on the Registry. These Registry Qualifying sites may or may not be on the Site Registry.
   - ASTM required.* Fannie Mae required.**  Source: New York State Department of Environmental Conservation 2

   - ASTM required.* Fannie Mae required.**  Source: U. S. Environmental Protection Agency 1
   - Data attributes updated through: 9/13/2011.

4) CERCLIS: Toxic sites listed in the Federal Comprehensive Environmental Response, Compensation and Liability Information System. Includes Active and No Further Remedial Action Planned (NFRAP) sites.
   - ASTM required.* Fannie Mae required.**  Source: U. S. Environmental Protection Agency 1
   - Data attributes updated through: 1/9/2008.

5) Brownfield Programs: NYS programs for sites that are abandoned, idled or under-used industrial and/or commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.
   - ASTM required.*  Source: New York State Department of Environmental Conservation 2
   - (a) Brownfield Cleanup Program (BCP)
   - (b) Voluntary Cleanup Program (VCP)
   - (c) Environmental Restoration Program (ERP)

6) Solid Waste Facilities: NYS Solid Waste Registry, including, but not limited to, landfills, incinerators, transfer stations, recycling centers.
   - ASTM required.* Fannie Mae required.**  Source: New York State Department of Environmental Conservation 2
   - Data updated to: 12/31/2001.

7) RCRA Hazardous Waste Treatment, Storage or Disposal Facility Databases:
     - ASTM required.* Fannie Mae required.**  Source: New York State Department of Environmental Conservation 2
     - Manifest transactions data updated to: 9/13/2011.
   - (b) RCRA Notifier & Violations Information: U. S. Environmental Protection Agency database of hazardous facilities regulated pursuant to the Resource Conservation and Recovery Act (RCRA).
     - ASTM required.* Fannie Mae required.**  Source: U. S. Environmental Protection Agency 1
     - Data attributes updated through: 9/13/2011.
8) **Spills Information Database**: Spills reported to the DEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from Petroleum Bulk Storage Regulations) or 6 NYCRR Section 595.2 (from Chemical Bulk Storage Regulations). This database includes both active and closed spills.

ASTM required.*  Fannie Mae.**  Source: NYS Department of Environmental Conservation.2

Spill attribute data through: 10/18/2011  Spill attribute data obtained by Toxics Targeting: 10/18/2011

Active spills: paperwork not completed.  Closed spills: paperwork completed.
Both active and closed spills may or may not have been cleaned up (see Date Cleanup Ceased in spill profiles).

9) **Major Oil Storage Facilities**: NYS database of facilities licensed pursuant to Article 12 of the Navigation Law, 6NYCRR Parts 610 and 17NYCRR Part 30, such as onshore facilities or vessels, with petroleum storage capacities equal to or greater than 400,000 gallons.

Tank and other data withheld by NYSDEC as of 4/1/2002.

ASTM required.*  Fannie Mae required.**  Source: New York State Department of Environmental Conservation.2

10) **Petroleum Bulk Storage Facilities**: County or State databases of aboveground and underground petroleum storage facilities.

ASTM required.*  Fannie Mae required.**

All New York Counties except Cortland, Nassau, Rockland, Suffolk:

NYS Petroleum Bulk Storage Database. This includes all New York State counties except Cortland, Nassau, Rockland, Suffolk, and Westchester.

Source: NYS Department of Environmental Conservation.2

Westchester County: Data updated through 10/1/1998

Cortland County: Cortland County Health Dept. Tank database.

Source: Cortland County Health Department7

Nassau County: a compilation of the following 2 databases:

Heat producing products and other products:

Source: Nassau County Department of Health.3

NOTE: This data is being withheld by the Nassau County DOH

Generally non-heat producing products:

Source: Nassau County Fire Marshal.4

Rockland County: Rockland County Dept. of Health Tank database.

Source: Rockland County Department of Health.5

Suffolk County: Suffolk County Dept. of Health Article 12 database

Source: Suffolk County Department of Health Services.6

11) **RCRA Hazardous Waste Generators and/or Transporters Databases**: (a) **Manifest Information**: New York State database of hazardous waste facilities and shipments regulated by the NYS Department of Environmental Conservation's Bureau of Hazardous Waste Facility Compliance pursuant to New York State Law.

ASTM required.*  Fannie Mae required.**  Source: New York State Department of Environmental Conservation.2

12) **Chemical Bulk Storage Facilities:** New York State database of facilities compiled pursuant to 6NYCRR Part 596 that store regulated substances listed in 6NYCRR Part 597 in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size. Tank and other data withheld by NYSDEC as of 4/1/2002.

ASTM required.* Fannie Mae required.**

Data updated through: 9/19/2011.

Data obtained by Toxics Targeting: 9/19/2011.

13) **Hazardous Substance Waste Disposal Site Study:** NYS database of waste disposal sites that may pose threats to public health or the environment, but could not be remediated using monies from the Hazardous Waste Remedial Fund.

Source: New York State Department of Environmental Conservation.2

Data updated to: 5/16/2000.

Data obtained by Toxics Targeting: 5/16/2000.

14) **Toxic Release Inventory (TRI):** Federal database of manufacturing facilities required under Section 313 of the Federal Emergency Planning and Community Right-to-Know Act to report releases to the air, water and land of any specifically listed toxic chemical. See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.1 / NYS Department of Environmental Conservation2

Data obtained by Toxics Targeting: 3/25/2004

15) **Toxic Wastewater Discharges (Permit Compliance System):** Federal database of discharges of wastewater to surface waters and groundwaters. See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.1

Data obtained by Toxics Targeting: 7/19/2004.

16) **Air Discharge Facilities:** EPA AIRS database containing address information on each air emission facility and the type of air pollutant emission it is. Compliance information is also provided on each pollutant as well as the facility itself.

See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency1

Data obtained by Toxics Targeting: 1/6/2000

17) **Civil Enforcement & Administrative Docket:** This database is the U. S. EPA's system for tracking administrative and civil judiciary cases filed on behalf of the agency by the Department of Justice. Fannie Mae required.**

Source: U. S. Environmental Protection Agency.1

New Sites through: 10/14/1999.

Data updated through: 10/14/1999.

Data obtained by Toxics Targeting: 11/18/1999.

ASTM required.* See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.1

Data obtained by Toxics Targeting: 2/15/2000

** Fannie Mae's Part X Environmental Hazards Management Procedures specify 1.0 mile searches for "any state or Federal list of hazardous waste sites (e.g. CERCLIS, HWDMs etc.)." Searches for the property and adjacent properties are specified for "chemical manufacturing plants," "obvious high risk neighbors engaging in storing or transporting hazardous waste, chemicals or substances" and "...any documented or visible evidence of dangerous waste handling... (e.g. stressed vegetation, stained soil, open or leaking containers, foul fumes or smells, oily ponds, etc.)" Searches for property and adjacent properties can include sites up to a quarter mile away (W. Hayward, Director, Multi-Family Business Planning and Control, Fannie Mae, personal communication, 5/94).

Toxics Targeting

Phase I
Environmental Database Report

Tappan Zee Bridge - Section 3
Nyack, NY 10960

October 24, 2011
LIMITED WARRANTY AND DISCLAIMER OF LIABILITY

Who is Covered
This limited warranty is extended by Toxics Targeting, Inc. only to the original purchaser of the accompanying Environmental Report ("Report"). It may not be assigned to any other person.

What is Warranted
Toxics Targeting, Inc. warrants that it uses reasonable care to accurately transcribe the information contained in this Report from the sources from which it is obtained. This limited warranty is in lieu of all other express warranties which might otherwise arise with respect to the Report. No one is authorized to change or add to this limited warranty.

What We Will Do
If during the warranty period there is shown to be a material error in the transcription of the information contained in this Report from the sources from which it was obtained, Toxics Targeting, Inc. shall refund to the original purchaser the full purchase price paid for the Report. The remedy stated above is the exclusive remedy extended to the Purchaser by Toxics Targeting, Inc. for any failure of the Report to conform with this Warranty, or otherwise for breach of this Warranty or any other warranty, whether expressed or implied.

What We Won’t Cover
Toxics Targeting, Inc. has not and can not verify the accuracy, correctness or completion of the information contained in this Report. Information is obtained from government agencies, site owners, and other sources, and errors are common in such information. Because Toxics Targeting, Inc. can not control the accuracy of the information contained in this Report, or the uses which may be made of the information, TOXICS TARGETING, INC. DISCLAIMS LIABILITY TO ANYONE FOR ANY EVENTS ARISING OUT OF THE USE OF THE INFORMATION. TOXICS TARGETING, INC. SHALL NOT BE LIABLE FOR ANY DAMAGE CAUSED BY THIS REPORT, WHETHER DIRECT OR INDIRECT, AND WHETHER OR NOT TOXICS TARGETING, INC. HAS BEEN ADVISED OF OR HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES. TOXICS TARGETING, INC. EXPRESSLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

Period of Warranty
The period of warranty coverage is ninety days from the date of purchase of this Report. There shall be no warranty after the period of coverage. ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR USE SHALL HAVE NO GREATER DURATION THAN THE PERIOD OF WARRANTY STATED HERE, AND SHALL TERMINATE AUTOMATICALLY UPON THE EXPIRATION OF SUCH PERIOD. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you.

PLEASE REFER TO PAGES ONE AND FIVE FOR A DESCRIPTION OF SOME OF THE LIMITATIONS OF THIS ENVIRONMENTAL REPORT.

© Toxics Targeting, Inc. 2011
Introduction

Toxics Targeting has combined environmental database searches, extensive regulatory analysis and sophisticated mapping techniques to produce your Environmental Report. It checks for the presence of 21 categories of government-reported toxic sites and provides detailed, up-to-date information on each identified site. The findings of your report are presented in an easy-to-understand format that:

1. **Maps** the approximate locations of selected government-reported toxic sites identified on or near a specified target address.

2. **Estimates** the distance and direction between the target address and each identified toxic site.

3. **Reports** air and water permit non-compliance and other regulatory violations.

4. **Profiles** some aspects of the usage, manufacture, storage, handling, transport or disposal of toxic chemicals at individual sites.

5. **Summarizes** some potential health effect information and drinking water standards for selected chemicals reported at individual sites.

The Three Sections Of Your Report

The first section highlights your report's findings by summarizing identified sites according to: 

- **a)** distance intervals,
- **b)** direction,
- **c)** proximity to the target address and
- **d)** individual site categories. In addition, the locations of all identified toxic sites are illustrated on individual maps for each radius search distance used in your report. A close-up map illustrates the locations of all identified toxic sites, at the shortest radius search distance used in your report. Finally, a map of tax parcels and a table of selected information about those parcels are included.

The second section of your report contains Toxic Site Profiles that provide detailed information on each identified toxic site. The information in each Toxic Site Profile varies according to its source. Some toxic site categories have extensive information, some have limited information. All the information is updated on a regular basis.

The third section of the report contains appendices that identify:

- **1)** on-site spills reported to the national Emergency Response Notification System (ERNS),
- **2)** various toxic sites that cannot be mapped due to incomplete or erroneous addresses or other mapping problems,
- **3)** codes that characterize hazardous wastes reported at various facilities,
- **4)** methods used to map toxic sites identified in your report and
- **5)** information sources used in your report.

How to Use Your Report

- Check Table One to see the number of identified sites by distance intervals.

- Check Table Two to see identified sites sorted by direction.

- Check Table Three to see identified sites sorted by site categories.

- Check Table Four to see identified sites ranked by proximity to the target address.

- Use Table Five to get info for the subject parcel and every parcel found on the Tax Parcel Map

- Refer to the various maps to see the locations of identified toxic sites. Refer to the Toxic Site Profile and Appendix sections for additional information.
Toxic Site Databases Analyzed In Your Report

Search Radius

One-Mile

1) National Priority List for Federal Superfund Cleanup: a listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program.

Half-Mile

2) Delisted National Priority List Sites: a listing of NPL sites that have been removed from the National Priority List.

One-Mile

3) New York Inactive Hazardous Waste Disposal Site Registry: a state listing of sites that can pose environmental or public health hazards requiring investigation or clean up.

One-Mile

One-Mile

5) RCRA Corrective Action Activity (CORRACTS): waste facilities with RCRA corrective action activity reported by the USEPA.

Half-Mile

6) CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System): a federal listing of Non-NFRAP sites that can pose environmental or public health hazards requiring investigation or clean up.

Half-Mile

7) CERCLIS NFRAP: a federal listing of CERCLIS sites that have no further remedial action planned.

Half-Mile

8) New York State Brownfield Cleanup Sites: a listing of sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Half-Mile

9) New York Solid Waste Facilities Registry: active and inactive landfills, incinerators, transfer stations or other solid waste management facilities.

Half-Mile

10) New York and Federal Hazardous Waste Treatment, Storage or Disposal Facilities: sites reported by the NYS manifest system and the USEPA’s Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following database:

• RCRA violations: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.
11) **Toxic Spills: active and inactive or closed** spills reported to state environmental authorities, including *remediated* and *unremediated* leaking underground storage tanks. This database includes the following categories:

- Tank Failures
- Tank Test Failures
- Unknown Spill Cause or Other Spill Causes
- Miscellaneous Spill Causes

12) **New York State Major Oil Storage Facilities**: sites with more than a 400,000-gallon capacity for storing petroleum products.

13) **New York and Local Petroleum Bulk Storage Facilities**: sites with more than a 1,100-gallon capacity for storing petroleum products.

14) **New York and Federal Hazardous Waste Generators and Transporters**: sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRA). Also includes the following database:

   - **RCRA violations**: waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

15) **New York Chemical Bulk Storage Facilities**: sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size.

16) **New York Hazardous Substance Disposal Site Draft Study**: a state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites are not eligible for state clean up funding programs.

17) **Federal Toxic Release Inventory Facilities**: discharges of selected toxic chemicals to air, land, water or treatment facilities.

18) **Federal Air Discharges**: Air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies.

19) **Federal Permit Compliance System Toxic Wastewater Discharges**: permitted toxic wastewater discharges.

20) **Federal Civil and Administrative Enforcement Docket**: judiciary cases filed on behalf of the U.S. Environmental Protection Agency by the Department of Justice.
21) **ERNS: Federal Emergency Response Notification System Spills**: a listing of federally reported spills.
Limitations Of The Information In Your Report

The information presented in your Environmental Report has been obtained from various local, state and federal government agencies. Please be aware that: 1) additional information on individual sites may be available, 2) newly discovered sites are continually reported and 3) all map locations are approximate. As a result, this report is intended to be the FIRST STEP in the process of identifying and evaluating possible environmental threats to specific properties and can only serve as a guide for conducting on-site visits or additional, more detailed toxic hazard research.

Toxics Targeting tries to ensure that the information in your report is presented accurately and with minimal alteration. The only systematic changes that are made correct obvious address errors in order to allow sites to be mapped. Any address changes that are made are noted in the map information section at the top of each corresponding Toxic Site Profile. Since the information presented in your report is not edited, please be aware that it can contain reporting errors or typographical mistakes made by the site owners/operators or government agencies that produced the information. Please be aware of some other limitations of the information in your report:

- The map used by Toxics Targeting is the same one used by the U. S. Census. While the map is generally accurate, no map is perfect. In addition, Toxics Targeting's mapping methods estimate where toxic site addresses are located if the address is not specifically designated on the Census map. FOR THESE REASONS, ALL MAP LOCATIONS OF ADDRESSES AND REPORTED TOXIC SITES SHOULD BE CONSIDERED APPROXIMATE AND SHOULD BE VERIFIED BY ON-SITE VISITS;

- UNDISCOVERED, UNREPORTED OR UNMAPPABLE TOXIC SITES MIGHT NOT BE IDENTIFIED BY THIS REPORT'S CHECK OF 21 TOXIC SITE CATEGORIES. TOXIC SITES REPORTED IN OTHER GOVERNMENT DATABASES MIGHT ALSO EXIST. FOR THESE REASONS, YOUR REPORT MIGHT NOT IDENTIFY ALL THE TOXIC SITES THAT EXIST IN THE AREA IT SEARCHES;

- The appendix of your report contains a listing of sites that could not be mapped due to incomplete or erroneous address information or other mapping problems. This listing includes unmappable toxic sites in zip code areas within one mile of the target address as well as toxic sites without zip codes reported in the same county. IF YOU WOULD LIKE INFORMATION ON ANY OF THE LISTED SITES, PLEASE CONTACT TOXICS TARGETING AND REFER TO THE SITE ID NUMBER.

- Some toxic sites identified in your report may be classified as known hazards. Most of the toxic sites identified in your report involve potential hazards related to the on-site use, manufacture, handling, storage, transport or disposal of toxic chemicals. Some of the toxic sites identified in your report may be the addresses of parties responsible for toxic sites located elsewhere. YOU SHOULD ONLY CONCLUDE THAT TOXIC HAZARDS ACTUALLY EXIST AT A SPECIFIC SITE WHEN GOVERNMENT AUTHORITIES MAKE THAT DETERMINATION OR WHEN THAT CONCLUSION IS FULLY DOCUMENTED BY THE FINDINGS OF AN APPROPRIATE SITE INVESTIGATION UNDERTAKEN BY LICENSED PROFESSIONALS;

- Compass directions and distances are approximate. Compass directions are calculated from the subject property address to the mapped location of each identified toxic site. The compass direction does not necessarily refer to the closest property boundary of an identified toxic site. The compass direction also can vary substantially for toxic sites that are located very close to the subject property address.

- The information presented in your report is a summary of the information that Toxics Targeting obtains from government agencies on reported toxic sites. YOU MAY BE ABLE TO OBTAIN ADDITIONAL INFORMATION ABOUT REPORTED SITES WITH THE FREEDOM OF INFORMATION REQUEST FORM LETTERS THAT ARE PROVIDED ON THE INSIDE OF THE BACK COVER.

Section Two: Toxic Site Profiles

The heading of each Toxic Site Profile refers to the site's map location and details:

- The facility name, address, city, state, and zip code.
- Any changes that were made to a site's address in order to map its location.
- The site mapping method that was used (see How Sites are Located, at the end of this section for more information).

Toxic Site Profiles summarize information provided by site owners or operators and government agencies regarding various toxic chemical activities reported at each site, such as:

- Whether chemicals were stored, produced, transported, discharged or disposed of.
- The name of chemicals and their Chemical Abstract Series (CAS) numbers.
- The amount of chemicals and the units (gallons/pounds) the chemical was measured in.
- Whether the site or storage tanks at the site are currently active or inactive.
- Special codes used by government agencies to regulate hazardous waste activities at some sites, or a complete description of the codes follows the profiles section.

For selected individual chemicals reported at various toxic sites, some potential health effect summary information appears below the site profile. Each potential health effect summary identifies chemicals by name and by Chemical Abstract Series (CAS) Number. An "x" under each potential health effect heading indicates positive toxicity testing results reported by the National Institute of Occupational Safety and Health's Registry of Toxic Effects of Chemical Substances (RTECS). Some chemicals (mostly appearing in profiles of Hazardous Waste facilities), are reported as mixtures, and RTECS health effect information is only available for individual chemicals. In addition, RTECS only provides information on approximately 100,000 common chemicals. Consequently, the absence of potential health effect summary information for a particular chemical identified in a Toxic Site Profile does not necessarily mean that the chemical does not pose potential health effects.

The Maximum Contaminant Level (MCL) in drinking water allowed for selected chemicals is also noted. In most cases, the only applicable MCL has been set by the New York State Department of Health (NYSDOH). Where NYSDOH has not set an MCL, the federal standard, if one exists, is listed and is marked by an asterisk.

Presented below are column headings that describe the health effect definitions used in RTECS and applicable New York State and federal drinking water standards. Reference sources for information presented in this section are also provided.

ACUTE TOX:  **Acute Toxicity**: Short-term exposure to this chemical can cause lethal and non-lethal toxicity effects not included in the following four categories.

TUMOR TOX:  **Tumorigenic Toxicity**: The chemical can cause an increase in the incidence of tumors.
MUTAG TOX: **Mutagenic Toxicity**: The chemical can cause genetic alterations that are passed from one generation to the next.

REPRO TOX: **Reproductive Toxicity**: May signify one of the following effects: maternal effects, paternal effects, effects on fertility, effects on the embryo or fetus, specific developmental abnormalities, tumorigenic effects, or effects on the newborn (only positive reproductive effects data for mammalian species are referenced).

IRRIT TOX: **Primary Irritant**: The chemical can cause eye or skin irritation.

MCL: **Drinking Water Standard - Maximum Contaminant Level** (MCL) listed under Drinking Water Supplies, 10 NYCRR Part 5, Subparts 1.51(f),(g), and (h) for NYDOH MCL's and under the Safe Drinking Water Act, 40 CFR 141, Subparts B and G, (* indicates value for total trihalomethanes) for federal MCL's.

Reference Source for Toxicity Information: Registry of Toxic Effects of Chemical Substances (RTECS), NIOSH (on-line database); For further information, contact: NIOSH, 4676 Columbia Parkway, Cincinnati, OH, 45226, 800/35-NIOSH.

Inactive Hazardous Waste Disposal Site Classifications: 1 -- Causing or presenting an imminent danger of causing irreversible or irreparable damage to the public health or the environment -- immediate action required; 2 -- Significant threat to the public health or environment -- action required; 3 -- Does not Present a significant threat to the environment or public health -- action may be deferred; 4 -- Site properly closed -- requires continued management; 5 -- Site properly closed, no evidence of present or potential adverse impact -- no further action required; 2a -- This temporary classification has been assigned to sites where there is inadequate data to assign them to the five classifications specified by law; A -- Work underway and not yet complete; P -- Potential Site; D1, 2, 3 -- Delisted Site (1: hazardous waste not found; 2: remediated; 3: consolidated site or site incorrectly listed); C -- Remediation Complete (formerly D2).

NAME: William Hand
ADDRESS: 122 SOUTH FRANKLIN STREET
SOUTH NYACK, NY 10960
Operator Type: Corporate or Commercial

SITE DESCRIPTION:
This site is located in a residential area of South Nyack, at 122 South Franklin Street. Between 1934 and 1964 the property was used as a research laboratory and for the small scale manufacture of lead acid batteries. Battery acid was reportedly disposed of on the ground and battery fragments are visible in the area behind the buildings. There is also an area on the northeast side of the property where lead plate, lead grid and plastic casings were reportedly buried after the acid had been removed. The property is fenced. This property is listed on the National Register of Historic Sites. A consultant for a responsible party collected soil samples from areas of stained soils and stressed vegetation. Significant levels of lead exist in surface soils (0-2 feet). Some samples for TCLP failed for lead, with levels ranging from less than 0.4 ppm to 1,000 ppm. The property is located in a residential area of South Nyack and has been declared a significant threat to the public health by the New York State Department of Health (NYSDOH). The PRP has conducted a unilateral soil removal. Offsite impacts have been studied under state superfund. An IRM consisting of soil removal from residential yards was completed in the fall of 1997. All remedial work has been completed and no monitoring is required. Contaminated soils, on-site and off-site have been removed to the satisfaction of the NYSDEC and this site has been delisted.

April 16, 2008: The NYSDEC has neither sought nor received any additional information since the site was delisted in March 1998. No update to the above Site Description is planned.

CONFIRMED HAZARDOUS WASTE DISPOSED:

<table>
<thead>
<tr>
<th>TYPE</th>
<th>QUANTITY</th>
</tr>
</thead>
<tbody>
<tr>
<td>LEAD (D008 WASTE)</td>
<td>UNKNOWN</td>
</tr>
</tbody>
</table>

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Confirmed contamination of soils by lead. Although the property is fenced, it was in a residential area and was declared a significant threat to public health by the NYSDOH. All remedial work has been completed and no monitoring is required. Contaminated soils, on-site and off-site have been removed to the satisfaction of the NYSDEC and this site has been delisted.

ASSESSMENT OF HEALTH PROBLEMS:
Access to the 4 acre residential estate is restricted by fencing. Precautions to minimize potential exposures to on-site contaminants were discussed with the site owner. Public water serves the area so exposure to potentially contaminated groundwater is not expected. A drinking water well (the sole water source) behind the main house has shown only low level or no lead contamination when sampled by the property owner. Cleanup of the on-site lead contamination by the owner eliminated the exposure concern on-site. Off-site dispersion of lead in the past contaminated soils on adjacent residential yards. Excavation and off-site disposal of contaminated soils attributed to the site was completed in November 1997 using State monies. Exposure
concerns related to former site wastes have been eliminated.

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION
DIVISION OF HAZARDOUS WASTE REMEDIATION
INACTIVE HAZARDOUS WASTE DISPOSAL SITE INFORMATION

CLASSIFICATION CODE: A  REGION: 3

SITE CODE: 344046  DEC ID: 56049
CLASSIFICATION CODE DESCRIPTION:
Work is underway and not yet complete.

NAME OF SITE: OR - Nyack MGP
STREET ADDRESS: 55 Gedney St
CITY: Nyack
ZIP: 10960-
COUNTY: Rockland
TOWN: Orangetown

SITE TYPE: Dump- Structure- Lagoon- Landfill- Treatment Pond-
ESTIMATED SIZE: 4.61 Acres

INSTITUTIONAL/ENGINEERING CONTROLS:
None reported

CROSS REFERENCES:
None reported

SITE OWNER/OPERATOR INFORMATION:
CURRENT OWNER(S):
NAME.......
ADDRESS...

SITE DESCRIPTION:
Location: The Nyack Manufactured Gas Plant (MGP) site a vacant property located on the west bank of the Hudson River in the
downtown area of Nyack, Rockland County, NY.

Site Features: The site consists of an upper terrace at the elevation of Gedney Ave. and a lower terrace along the Hudson River.
The entire site is currently landscaped to the rip/rap shoreline. The site is fenced to prevent trespassing.

Current Zoning/Use: Downtown Nyack has a blend of residential and commercial properties, including a marina immediately to the
north and a multi-unit residential complex immediately to the south of the site. The site is zoned "waterfront," which is
intended to encourage uses along and near the Hudson River related to, and appropriate for, a waterfront area.

Historical Use: A manufactured gas plant (MGP) operated at this site from 1852 until 1965. Gas was made by heating coal and/or
petroleum products in closed vessels. The gas was then cooled, purified, and distributed through a network of underground pipes
in surrounding communities, where it was used in much the same way that natural gas is used today. Routine use of the plant was
discontinued in 1938. From 1938 until 1965, the MGP was used only during times of peak demand, a practice known as "peak
shaving." The site-related contamination is coal tar, which was a condensate from the gas manufacturing process. Tar would
condense from the hot gas as it was being cooled and purified. Some of this tar escaped from pipes, storage vessels, and other
subsurface structures into the surrounding soils. The locations of former MGP structures are shown on Figure 2.

Operable Units: The site has been divided into 2 operable units. An operable unit represents a portion of the site that for
technical or administrative reasons can be addressed separately to eliminate or mitigate a release, threat of release or exposure
pathway resulting from the site contamination. This document pertains to Operable Unit 2.

Remediation of Operable Unit 1 (OU1), the portion of the site above the 100 year flood line, is complete. A large scale
excavation was completed in the western portion of OU1 during 2006. Contaminated soils in two other areas to the south and east were treated with an in-situ solidification process in 2006 and 2007. The OU1 area was then covered with clean topsoil and restored to a park-like setting.

Operable Unit 2 (OU2), which is the subject of this document, consists of the remaining land (below the 100 year flood line and above the mean high water mark) and the Hudson River sediment which has been impacted by site-related contamination.

Site Geology and Hydrogeology: OU2 is covered with a varying thickness of fill. The jetty area which protrudes into the Hudson River has the thickest layer of fill (13 feet). A second significant area of fill is the slope between the upper and lower terraces, which was apparently placed after plant operations had ended. A layer of native silty sand generally underlies the fill material. A layer of glacial till was noted in one boring on the upper terrace. Underlying the silty sand is sandstone bedrock. The bedrock is a productive aquifer with the groundwater flowing upward through the bedrock. The overburden in the upper terrace is entirely above groundwater. In the lower terrace, groundwater is found in the overburden, and is seen to fluctuate with the tide, indicating some hydraulic communication between the river and the groundwater.

CONFIRMED HAZARDOUS WASTE DISPOSED:

<table>
<thead>
<tr>
<th>TYPE</th>
<th>QUANTITY</th>
</tr>
</thead>
<tbody>
<tr>
<td>COAL TAR</td>
<td>UNKNOWN</td>
</tr>
<tr>
<td>Polycyclic Aromatic Hydrocarbons (PAHs), Total</td>
<td>UNKNOWN</td>
</tr>
</tbody>
</table>

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
The primary contaminant of concern at this site is coal tar (a condensate from the gas manufacturing process). Coal tar contains BTEX compounds (benzene, toluene, ethylbenzene, and xylene) and PAHs (polycyclic aromatic hydrocarbons). Investigations have shown coal tar and contaminated groundwater to be present at the site. Site related contaminants have also been observed in the sediment in the Hudson River at levels above applicable sediment standards. No site related contamination has been observed in surface water at levels above applicable standards.

The site presents an environmental threat due to the ongoing presence of coal tar in the subsurface and releases of contamination from the coal tar into the groundwater and into the aquatic environment.

ASSESSMENT OF HEALTH PROBLEMS:
Operable Unit 1: Since the site is covered by a combination of asphalt and clean soil, people will not come in contact with subsurface contamination unless they dig below these cover materials. People are not drinking contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. They will not come into contact with contaminated groundwater unless they dig deeper than six feet below the ground surface.

Volatile organic compounds in the groundwater and/or soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Data indicate inhalation of site-related contaminants via soil vapor intrusion is not a concern off-site. The potential for soil vapor intrusion will be evaluated for any buildings developed on-site.

Operable Unit 2:
Persons who dig below the ground surface may come in contact with contaminants in subsurface soil. People may come in contact with contaminants present in shallow river sediments while entering or exiting the river.

SITE DESCRIPTION:

The investigation of this site is currently being proposed under the Brownfield Cleanup Program (BCP). The site is 0.7 acres and is located at 90 Clinton Avenue in the Village of South Nyack, Rockland County.

The site is located in a suburban area comprised of primarily single-family residential properties. It is relatively level and has a gentle downward slope to the east, towards the Hudson River.

Current use is commercial and industrial.

The property is site of the former Nyack Ice Company and is an irregularly shaped parcel which has 127 feet of frontage on the north side of Clinton Avenue. An icehouse is located on the southwestern corner of the property and occupies approximately one-third of the lot. A small office is located directly east of the icehouse and a garage is located on the northern portion of the property. Located throughout the property are two freezers, an abandoned trailer and what appears to be several abandoned vehicles. The site is largely unused except for a small portion apparently being used for construction equipment and other storage.

Contaminants known to affect the soil, groundwater and soil gas are petroleum and SVOC’s. Suspected contaminants affecting this same media are chlorinated solvents, other VOC’s, SVOC’s and metals.

A Phase I Environmental Assessment (2004) and a Phase II Environmental Assessment (2005) have been completed.

Current Status:  
April 12, 2007  
This BCP application has been approved. RI is substantially complete and an IRM work plan has been approved.  
July 08, the RI and IRM’s are substantially completed and the reports are pending.
CONFIRMED HAZARDOUS WASTE DISPOSED:
None reported

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Information submitted with the BCP application regarding the environmental conditions at the site are currently under review and will be revised as additional information becomes available.

ASSESSMENT OF HEALTH PROBLEMS:
Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

HAZARDOUS MATERIAL SPILLS INTRODUCTION

The Hazardous Material Spills in this section are divided into eight spill cause groupings. These include:

Active Spills Section: Spills with incomplete paperwork that may or may not be cleaned up (See Date Cleanup Ceased)
1) Tank Failures
2) Tank Test Failures
3) Unknown Spill Cause or Other Spill Cause Hazardous Spills

Closed Status Spills Section: Spills with completed paperwork that may or may not be cleaned up (See Date Cleanup Ceased)
5) Tank Failures
6) Tank Test Failures
7) Unknown Spill Cause or Other Spill Cause Hazardous Spills

All spills within each spill cause category are presented in order of proximity to the subject site address.

Please note that spills reported within 0.25 mile (or one-eighth mile in New York City) are mapped and profiled.

Between 0.25 mile (or one-eighth mile in New York City) and 0.5 mile, only the following spills are mapped and profiled:

* Tank Failures;
* Tank Test Failures;
* Unknown Spill Cause or Other Spill Cause;
* Spills greater than 100 units of quantity; and
* Spills reported in the NYSDEC Fall 1998 MTBE Survey.

A table at the end of each section presents a listing of reported Miscellaneous Spills with less than 100 units located between 0.25 mile (or one-eighth mile in Manhattan) and 0.5 mile. These spills are neither mapped nor profiled.
NO ACTIVE TANK FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO ACTIVE TANK TEST FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO ACTIVE UNKNOWN CAUSE SPILLS AND OTHER CAUSE SPILLS IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS
NO ACTIVE HAZARDOUS SPILLS - MISC. SPILL CAUSES - EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, AND VANDALISM - IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS.

All spills mapped and profiled within 1/4 mile. Between 1/4 mile and 1/2 mile search radius, spills reported to be greater than 100 units and spills reported in the NYSDEC Fall 1998 MTBE Survey are mapped and profiled. Spills reported to be less than 100 units are listed in a table at the end of this section.

THE FOLLOWING ACTIVE SPILLS FOR THIS CATEGORY WERE REPORTED BETWEEN 1/4 MILE AND 1/2 MILE SEARCH RADIUS FROM THE SUBJECT ADDRESS. THESE SPILLS WERE REPORTED TO BE LESS THAN 100 UNITS IN QUANTITY AND CAUSED BY: EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, OR VANDALISM. THESE SPILLS ARE NEITHER MAPPED NOR PROFILED IN THIS REPORT.

Map Identification Number 8  HOMEOWNER FUEL OIL SPILL
11 VOORHIS POINT  NYACK, NY
Spill Number: 0600282  Close Date: 01/12/2007
TT-Id: 520A-0268-132
Caller Remarks:

Caller reports a diesel sheen on the stream going to the Hudson River. Appears to be coming from a storm drain that empties into the stream.

DEC Investigator Remarks:

04/10/06: R. Amato responding, O'Mara advised. R. Amato on site with ECO’s. Located source, U/G tank that thook on stormwater and overflowed. RP hired Tri State Environmental who responded for clean up.

Responded on Saturday April 8, 2006. The spill source was a old residents 550 gal. fuel oil UST no longer in service. The owners USTs fill pipe was busted at the top of tank and rain water from the roofs gutter emptied into the tank causing an overflow of old #2 fuel oil. Approx. 15 gallons was released to a storm drain which emptied into a small creek to the Hudson. Much of the soil at the spill location was impacted. That day the owner hired Tri-State to pump out (520 gals water/fuel mix) the tank and set up pads and boom at the creek and Hudson. When I arrived on site (1600 hrs) no fuel was flowing from the storm drain to the creek. There was a sheen (no product) on creek and in the Hudson (very little). A boom was also placed at a residents (11 Voorhis Pt.) boat ramp to keep any sheen from entering the yard due to high tides. Sunday Tri-State cleaned debris (leaves, etc.) from the creek and placed pads in a few storm drains. That following Monday, 4/10, Tri-State was going to remove the UST and clean up any impacted soils and check pads & booms. RA

**Caller Remarks:**

OIL IS EMERGING ON TO SUBSURFACE BY BASKETBALL COURTS AND PROPERTY MANAGER WILL GET CLEAN UP CREW TO CLEAN AND SPILL IS CONTAINED

**DEC Investigator Remarks:**

6/20/08  Cathy Quinn called with an update. Royal investigated and found an old UST, they’re guessing about a 5k. They were on site today and removed about 70 gallons of #6 FO. Stream looks okay. Royal has secured location and will be back tomorrow. jc

9/4/08: Royal removed 2,200 gallons of a water and #6 oil mixture from the tank on 7-12-08. Area was also secured with fencing due to pedestrian traffic in the area. Royal received permit to remove tank from the Nyack Bld Dept on 7-18-08, and were scheduled to remove the tank on 7-29-08. Tank has subsequently been removed and contaminated soil was disposed of. RCDOH was on site during remedial work. Further issues with neighboring residents ongoing. jod

1/6/11  Email to Eugene Conroy

Dear Mr. Conroy

After reviewing DRE’s and Royal’s reports along with RCDOH’s memos the Following has been determined:

1) The Tank Closure is complete and spill # 0803294 is closed.

2) The fugitive air emissions reported at head start and investigated by the RCDOH never indicated any emissions.

3) No evidence of any other tanks has been found at this time.

If in the future any environmental impact occurs or more evidence of other buried tanks emerges The Department reserves the right to open another spill number and instigate further investigations.

Any questions please do not hesitate to contact me either by email or at 845 356 3112.

Very Truly Yours
John K O’Mara, P.E.

CLOSED STATUS HAZARDOUS SPILLS - MISC. SPILL CAUSES - EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, AND VANDALISM - IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS.

All spills mapped and profiled within 1/4 mile. Between 1/4 mile and 1/2 mile search radius, spills reported to be greater than 100 units and spills reported in the NYSDEC Fall 1998 MTBE Survey are mapped and profiled. Spills reported to be less than 100 units are listed in a table at the end of this section.

Please Note: * - Compass directions can vary substantially for sites located very close to the subject property address.

Hazardous waste codes presented in individual Toxic Information Profiles are defined below.

D008  Lead

Source: U. S. Environmental Protection Agency
How Toxic Site Locations Are Mapped

Toxics Targeting maps toxic site locations on a digital version of the U.S. Census map or those used by local authorities using addresses and map coordinates provided by site owners/operators or government agencies. In order to allow site locations to be verified independently, the information used to map each site is presented in the first section of each Toxic Site Profile, along with a description of the mapping technique used and any address corrections that were made in order to locate toxic sites with incomplete or inadequate site location information. The mapping process is explained below.

Map Identification Number: 12
Site Name: Acme World Manufacturing, Inc.
Site Address: 55 Main Street
Anytown, NY 11797

MAP LOCATION INFORMATION

Site location mapped by:

Address Matching

Note: Some sites have an address match location and a map coordinate location. Both locations are mapped because they can be equally correct.

or Map Coordinate

or Manual Mapping

or Site Visit

1) Most toxic sites are mapped by matching addresses provided by site owners/operators or government agencies with locations on a digital version of the street or parcel map. These site locations are identified with the method used to map them.

2) Some toxic sites are located using map coordinates provided by site owners/operators or government agencies. These site locations are identified as "map coordinate." Map coordinates for Toxic Wastewater Discharges, Toxic Release Inventory sites and Major Oil Storage Facilities should be considered suspect.

3) Incomplete addresses or map coordinates require some site locations to be determined by commercial street maps (manual mapping), site visits, map coordinates from other databases and address location services. Application of any of these methods is identified accordingly.

4) Site addresses are sometimes corrected to eliminate obvious errors that prevent sites from being mapped. All address corrections are noted here.

ADDRESS CHANGE INFORMATION

Revised Street: NO CHANGE
Revised zip code: NO CHANGE

4) Site addresses are sometimes corrected to eliminate obvious errors that prevent sites from being mapped. All address corrections are noted here.
Information Source Guide

Toxics Targeting's Environmental Reports contain government and other information compiled on 18 categories of reported known or potential toxic sites. Each toxic site database is described below with information detailing a) the source of the information, b) the date when each database is covered to and c) when Toxics Targeting obtained the information.

1) National Priority List for Federal Superfund Cleanup: Toxic sites nominated for cleanup under the Federal Superfund program. Annual compilation of special two-page detailed profiles of NPL sites. Also includes delisted NPL sites.  Source: U. S. Environmental Protection Agency. 1

2) Inactive Hazardous Waste Disposal Site Registry: New York State database that maintains information and aids decision making regarding the investigation and cleanup of toxic sites. The Registry's data includes two-page profiles noting site name, ID number, description, classification, cleanup status, types of cleanup, owner information, types and quantities of contaminants, and assessment of health and environmental problems. Also included are sites that qualify for possible inclusion on the Registry. These Registry Qualifying sites may or may not be on the Site Registry.  Source: New York State Department of Environmental Conservation. 2

4) CERCLIS: Toxic sites listed in the Federal Comprehensive Environmental Response, Compensation and Liability Information System. Includes Active and No Further Remedial Action Planned (NFRAP) sites.  Source: U. S. Environmental Protection Agency.  1

5) Brownfield Programs: NYS programs for sites that are abandoned, idled or under-used industrial and/or commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.  Source: New York State Department of Environmental Conservation.  2
   (a) Brownfield Cleanup Program (BCP)
   (b) Voluntary Cleanup Program (VCP)
   (c) Environmental Restoration Program (ERP)

6) Solid Waste Facilities: NYS Solid Waste Registry, including, but not limited to, landfills, incinerators, transfer stations, recycling centers.  Source: New York State Department of Environmental Conservation.  2

7) RCRA Hazardous Waste Treatment, Storage or Disposal Facility Databases:
   (b) RCRA Notifier & Violations Information: U. S. Environmental Protection Agency database of hazardous facilities regulated pursuant to the Resource Conservation and Recovery Act (RCRA).  Source: U. S. Environmental Protection Agency.  1
8) **Spills Information Database**: Spills reported to the DEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from Petroleum Bulk Storage Regulations) or 6 NYCRR Section 595.2 (from Chemical Bulk Storage Regulations). This database includes both active and closed spills.

ASTM required.*  Fannie Mae.**  

Source: NYS Department of Environmental Conservation.2

New spills through: 7/22/2011  
New spills data obtained by Toxics Targeting: 7/22/2011

Spill attribute data through: 10/18/2011  
Spill attribute data obtained by Toxics Targeting: 10/18/2011

Active spills: paperwork not completed.  
Closed spills: paperwork completed.

Both active and closed spills may or may not have been cleaned up (see Date Cleanup Ceased in spill profiles).

9) **Major Oil Storage Facilities**: NYS database of facilities licensed pursuant to Article 12 of the Navigation Law, 6NYCRR Parts 610 and 17NYCRR Part 30, such as onshore facilities or vessels, with petroleum storage capacities equal to or greater than 400,000 gallons. 

**Tank and other data withheld by NYSDEC as of 4/1/2002.**

ASTM required.*  Fannie Mae required.**  

Source: New York State Department of Environmental Conservation.2

Data updated through: 9/19/2011.  
Data obtained by Toxics Targeting: 9/19/2011.

10) **Petroleum Bulk Storage Facilities**: County or State databases of aboveground and underground petroleum storage facilities.

ASTM required.*  Fannie Mae required.**

All New York Counties except Cortland, Nassau, Rockland, Suffolk:

**NYS Petroleum Bulk Storage Database.** This includes all New York State counties except  

Cortland, Nassau, Rockland, Suffolk, and Westchester.  

Source: NYS Department of Environmental Conservation.2

New facilities updated through: 9/19/2011.  
Data obtained by Toxics Targeting: 9/19/2011.

Tank data updated through: 9/19/2011.  
Data obtained by Toxics Targeting: 9/19/2011.

Westchester County: Data updated through 10/1/1998

Cortland County:  **Cortland County Health Dept. Tank database.**  
Source: Cortland County Health Department7  
Data updated through: 7/15/2004  
Data obtained by Toxics Targeting: 7/23/2004

Nassau County: a compilation of the following 2 databases:

**Heat producing products and other products:**  
Source: Nassau County Department of Health.3  
NOTE: This data is being withheld by the Nassau County DOH  
Data obtained by Toxics Targeting: 1/2/2002

**Generally non-heat producing products:**  
Source: Nassau County Fire Marshal.4  
Data updated through: 8/6/2009.  
Data obtained by Toxics Targeting: 9/22/2009

Rockland County:  **Rockland County Dept. of Health Tank database.**  
Source: Rockland County Department of Health.5  
Data obtained by Toxics Targeting: 4/16/2004.

Suffolk County:  **Suffolk County Dept. of Health Article 12 database**  
Source: Suffolk County Department of Health Services.6  
Data obtained by Toxics Targeting: 7/12/2006.

11) **RCRA Hazardous Waste Generators and/or Transporters Databases:**

(a) **Manifest Information**: New York State database of hazardous waste facilities and shipments regulated by the NYS Department of Environmental Conservation’s Bureau of Hazardous Waste Facility Compliance pursuant to New York State Law.

ASTM required.*  Fannie Mae required.**  

Source: New York State Department of Environmental Conservation.2

Manifest transactions data updated to: 9/13/2011.  
Manifest transactions data obtained by Toxics Targeting: 10/4/2011.
(b) **RCRA Notifier & Violations Information**: U. S. Environmental Protection Agency database of hazardous facilities regulated pursuant to the Resource Conservation and Recovery Act (RCRA).

ASTM required.* Fannie Mae required.**

- Data attributes updated through: 9/13/2011.

Source: U. S. Environmental Protection Agency

Data obtained by Toxics Targeting: 9/26/2011.

Data obtained by Toxics Targeting: 9/26/2011.

12) **Chemical Bulk Storage Facilities**: New York State database of facilities compiled pursuant to 6NYCRR Part 596 that store regulated substances listed in 6NYCRR Part 597 in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

Data updated through: 9/19/2011.

Tank and other data withheld by NYSDEC as of 4/1/2002.

Source: New York State Department of Environmental Conservation.

Data updated to: 5/16/2000.

Data obtained by Toxics Targeting: 5/16/2000.

13) **Hazardous Substance Waste Disposal Site Study**: NYS database of waste disposal sites that may pose threats to public health or the environment, but could not be remediated using monies from the Hazardous Waste Remedial Fund.

Source: New York State Department of Environmental Conservation.

Data updated to: 5/16/2000.

Data obtained by Toxics Targeting: 5/16/2000.

14) **Toxic Release Inventory (TRI)**: Federal database of manufacturing facilities required under Section 313 of the Federal Emergency Planning and Community Right-to-Know Act to report releases to the air, water and land of any specifically listed toxic chemical. See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency. / NYS Department of Environmental Conservation

Data obtained by Toxics Targeting: 3/25/2004

15) **Toxic Wastewater Discharges ( Permit Compliance System)**: Federal database of discharges of wastewater to surface waters and groundwaters. See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.

Data obtained by Toxics Targeting: 7/19/2004.

16) **Air Discharge Facilities**: EPA AIRS database containing address information on each air emission facility and the type of air pollutant emission it is. Compliance information is also provided on each pollutant as well as the facility itself.

See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.

Data obtained by Toxics Targeting: 1/6/2000

17) **Civil Enforcement & Administrative Docket**: This database is the U. S. EPA's system for tracking administrative and civil judiciary cases filed on behalf of the agency by the Department of Justice. Fannie Mae required.**

Source: U. S. Environmental Protection Agency.

New Sites through: 10/14/1999.

Data obtained by Toxics Targeting: 11/18/1999.

18) **Emergency Response Notification System ( ERNS)**: Federal database of spills compiled by the Emergency Response Notification System. On-site searches only.

ASTM required.* See Fannie Mae requirement** below.

Source: U. S. Environmental Protection Agency.

Data obtained by Toxics Targeting: 2/15/2000

** Fannie Mae's Part X Environmental Hazards Management Procedures specify 1.0 mile searches for "any state or Federal list of hazardous waste sites (e.g. CERCLIS, HWDSMS etc.)." Searches for the property and adjacent properties are specified for "chemical manufacturing plants," "obvious high risk neighbors engaging in storing or transporting hazardous waste, chemicals or substances" and "...any documented or visible evidence of dangerous waste handling... (e.g. stressed vegetation, stained soil, open or leaking containers, foul fumes or smells, oily ponds, etc.)" Searches for property and adjacent properties can include sites up to a quarter mile away (W. Hayward, Director, Multi-Family Business Planning and Control, Fannie Mae, personal communication, 5/94).
